MESSAGE FROM PRESIDENT

President of the World Water Council

We have built a strong, professional, and friendly relationship with Indonesia and the World Water Council, which provides a solid foundation for an effective and successful joint organization of the 10th World Water Forum.

Water is the only natural element that cannot be replicated. Water cannot be replenished, but air and soil can! And this is a straightforward reason to take good care of it.

We have chosen the simple motto “water for shared prosperity” for this 10th Forum. This obligation to share in order to achieve abundance, peace, and serenity. However, sharing necessitates possessing, protecting, safeguarding, and respecting.

This is what we want to say: “spare to share,” “spare water to share prosperity.” Let us save water in order to share its benefits, its presence, its quantity, and its quality. There is a sentence in every language and religion that says “water is life.”

And the Bali World Water Forum is reaching out to us to change the course of water history, to write its future of abundance in order to achieve shared prosperity.

Yes, let us work together to save water for shared prosperity! Please be the Future of Water. Take it in your hands so that tomorrow, thanks to you, it can be said, “When water flows, happiness flows.”

Let us all work together to ensure the success of the 10th World Water Forum in Bali, 18-24 May 2024!

LOÏC FAUCHON

President of the World Water Council

MESSAGE FROM CHAIRMAN

Coordinating Minister for Maritime and Investment Affairs of the Republic of Indonesia

Water is a basic needs of human survival. The water crisis, on the other hand, is a global issue that is becoming increasingly complex, necessitating the right solution. Access to safe drinking water is a basic human right, but millions of people around the world do not have it. As we work to achieve Sustainable Development Goals, ensuring universal access to water and sanitation by 2030, we must also consider the role of water in driving economic growth and prosperity.

Water is an important resource that powers agriculture, industry, and energy production. It is critical for community health and the environment's well-being. Water resource management, on the other hand, necessitates collaboration and innovative solutions that balance economic, social, and environmental needs.

Throughout the 10th World Water Forum, we will discuss how to achieve water security while promoting economic growth and prosperity. Stakeholders from around the world can use this platform to come together and collaborate to find long-term solutions to this increasingly complex water problem.

I believe the 10th World Water Forum will be a valuable platform for addressing the world's water issues. We must collaborate and work together to find innovative and sustainable solutions to provide clean and healthy water to all people worldwide. I encourage you to take full advantage of the events planned for

Luhut Binsar Pandjaitan

Coordinating Minister for Maritime and
Investment Affairs
of the Republic of Indonesia

this forum, to learn from one another, share your experiences, and build relationships that will allow us to work together long after this forum has ended.

I'd like to thank you for your participation and assistance in making this activity a success. Let us join forces to solve the world's water problems and build a better future at the 10th World Water Forum.

MESSAGE FROM VICE CHAIRMAN 1/CHIEF OPERATING OFFICER

Minister of Public Works and Housing of the Republic of Indonesia

I am honored and proud that Indonesia will host and organize the 10th World Water Forum, the world's largest multi-stakeholder water meeting forum. This activity will take place in Bali in 2024, from the 18th to the 24th of May.

The 10th World Water Forum's theme is "Water for Shared Prosperity." We are all convinced that water is an essential resource for human survival, the environment, and the economy. It is appropriate for all parties to devote their full attention and efforts to ensuring its long-term viability.

Despite numerous challenges in managing its water resources, Indonesia, as an archipelagic country, can serve as a model for the rest of the world. I am confident that this meeting will provide stakeholders with an opportunity to share their experiences, knowledge, and solutions to global water challenges.

I hope that this event demonstrates Indonesia's ability to contribute to global challenges, such as water issues.

The activities will also provide an opportunity for all global water stakeholders to expand their professional networks, participate in fruitful discussions, and create a better future for all of us by ensuring everyone has access to safe and equitable water.

M. Basuki Hadimuljono

Minister for Public Works and Housing
of the Republic of Indonesia

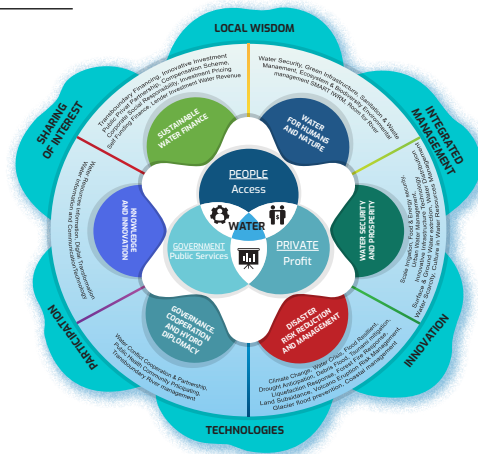

THEME

WATER FOR SHARED PROSPERITY

Water has always had a precious and elevated position in human cultures, as we realize that water is essential for human life since ancient times. From daily consumptions to purifications, conservations, cultivations and so on, some communities even view water as life itself and as the source of immortality.

Nowadays, water management often becomes the main issues in international events and declarations, including the Sustainable Development Goals (SDGs). The SDGs include a dedicated water goal that must be achieved by 2030 to ensure sustainable living.

The importance of water is more specifically mentioned in the SDG number 6, Clean Water and Sanitation for all, with related and more detailed targets. In order to achieve those targets, all stakeholders need to work together and understand each other needs. Good water management can help us achieve prosperity together, and for all. Water plays central role in achieving shared prosperity. In the 10th World Water Forum, we hope that we can give the societies what they need to achieve shared prosperity through understanding and solving water related issues.

MAIN PLAYERS OF THE FORUM:

- International Organizations,
- Government
- Academia
- Civil Societies including the youth
- Private Sector

MANAGING WATER TOGETHER WITH THE AIM OF PROSPERITY FOR ALL THROUGH:

- INTEGRATED MANAGEMENT
- CONTINUOUS INNOVATION
- LATEST TECHNOLOGIES
- ACTIVE PARTICIPATION
- SHARING OF INTERESTS
- LOCAL WISDOM

SUB THEME

Three Processes of the 10th World Water Forum will coordinate diversified actions and implementation of solutions to the identified primary themes and prioritized political agenda as well as regional needs to spare water for shared prosperity

Political Process

Government, parliamentarians, Ministers, local authorities, and basin authorities develop political agendas to discuss and find solutions.

Thematic Process

All global multi-stakeholders develop and facilitate the implementation of action plans mobilizing various organizations and experts to have concrete and practical solutions to imminent water issues identified during the process associated with each theme and topic.

Regional Process

In different regions and sub-regions, develop and facilitate the action to resolve regional primary water issues and find context-specific solutions to the local water situation. In this process, better understanding of the regional water context and cooperative structure for common solutions is expected.

FORUM PROCESSES:

OBJECTIVES AND MODALITIES

Process Framework Main Theme : Water for Shared Prosperity

Water for Humans and Nature
Water Security and Prosperity
Disaster Risk Reduction and Management
Governance, Cooperation and Hydro Diplomacy
Sustainable Water Finance
Knowledge and Innovation

Common Challenge : Climate Change, Population Growth, Urbanization, Energy Crisis, Soil, and Air Pollution, etc.
Cross-cutting Enablers : Governance, Science and Technology, Innovation, Financing & Investment, Cooperation and Partnership, Policy Development, Circular Economy, Education & Capacity Building

Political Process

- Head of States
- Parliamentarian
- Ministerial
- Local Authorities
- Basin Authorities

Thematic Process

- Topics of Water for Humans and Nature
- Topics of Water Security and Prosperity
- Topics of Disaster Risk Reduction and Management
- Topics of Governance, Cooperation and Hydro Diplomacy
- Topics of Sustainable Water Finance
- Topics of Knowledge and Innovation

Regional Process

- Mediterranean
- Asia Pacific
- to be defined
- to be defined

POLITICAL PROCESS

MAIN AGENDA AND ACTIVITIES TOWARDS 10TH WORLD WATER FORUM

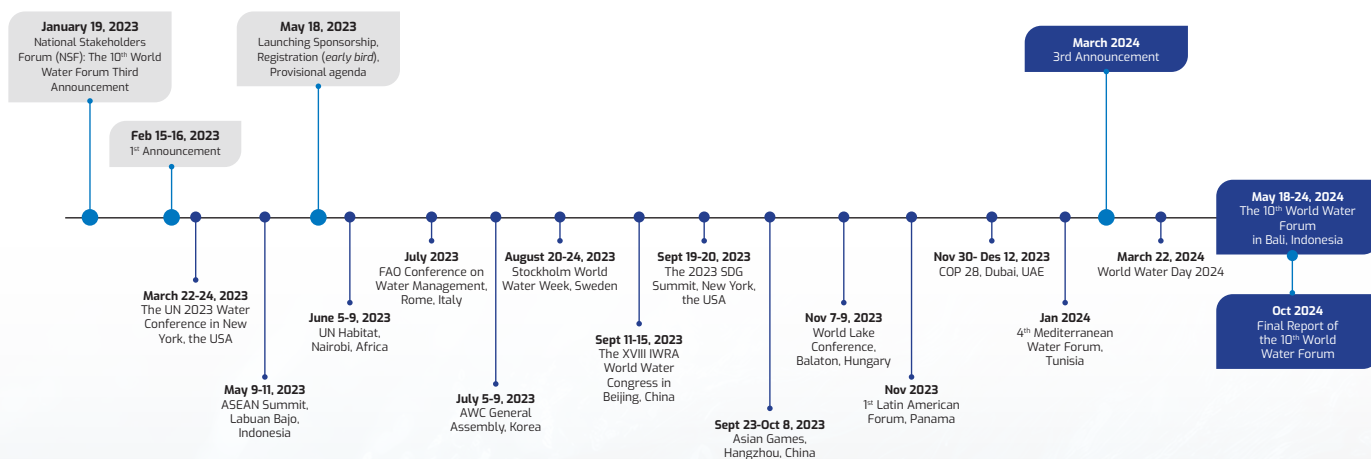

MAIN AGENDA

Kick-off Meeting
1st Stakeholder Consultation Meeting
Feb 15– 16, 2023 (Jakarta)

2nd Stakeholder Consultation Meeting
October 12-13, 2023 (Bali)

The 10th World Water Forum
May 18-24, 2024 (Bali)

TIMELINE OF MAIN AGENDA AND SUPPORTING ACTIVITIES

About the 10th World Water Forum

The World Water Council (WWC) represents a multi-stakeholder platform devoted to the advancement and resolution of key water issues requiring the involvement of governmental, scientific, technical, and advocacy representatives. The credibility of the World Water Forum vitally depends on the involvement of a wide diversity of stakeholders from the entire world without discrimination and with the freedom of expression and opinion of all-both in the preparatory process and at the event.

In this regard, the Indonesian proposal for the 10th World Water Forum, which highlights water occurrences in Indonesia Archipelago, has an important role in the matter of water to support the needs of 260 million people, industries, and irrigation needs of a country composed of more than 17,000 islands with 1,922,570 square kilometers of land area and 3,257,483 square kilometers of sea.

The World Water Forum should advance the aims of the World Water Council and the world water community in addressing challenging water issues. The Forum should accomplish this by facilitating and promoting a multifaceted discussion and debate open to all stakeholders before and during the Forum, resulting in political mobilization a broader awareness of water management issues and actions to solve those issues.

The World Water Forum, thus, aims to:

- engage stakeholders in mobilizing debate on and action for water, open to all parties in developing a shared vision;
- provide a platform for all stakeholders to exchange, learn, develop partnerships and catalyze concrete actions for improved water resources and services development and management;

- engage policy and decision-makers in a dialogue to establish commitments for improved water resources and service development;
- increase awareness for water issues towards the public-at-large, in particular through the media; and
- encourage innovative ideas and tools outdo contemporary water solutions into action.

To support the objectives of the World Water Council, the Forum, and the world water community, the Forum is made up of the following primary components:

- The Thematic Process provides the substantive underpinning of the World Water Forum;
- The Political Process provides the opportunity for discussion amongst and

with elected officials at all levels (head of government, ministerial, parliamentary, river basin authorities);

- The Regional Process provides perspectives on water from all regions of the world;
- The Fair and Expo provide a space for all stakeholders to showcase their contributions;

In addition, other events are organized throughout the preparation period and during the World Water Forum event, offering additional opportunities for all stakeholders to meet, learn, debate and present issues, policies and state-of-the-art solutions for efficient and sustainable water resources and services management and to communicate this to a worldwide audience.

Political Program**

WHY? EXHIBIT at the 10th World Water Forum

INDONESIA IS THE LARGEST POTENTIAL MARKET.

With 260 million people, more than 17,000 islands, 3,257,483 square kilometers of coastlines, thousands of industries, and irrigations, Indonesia encounters various water-related challenges such as water quality and water resources management.

BE A PART OF THE LARGEST INTERNATIONAL FORUM.

The 10th World Water Forum is a global event in the water sector that gathers various stakeholders. The Forum has been held every three years since its inaugural in 1997.

REACH AN INCREDIBLY DIVERSE AUDIENCES.

More than 10.000 leading water-related companies and organizations will come to learn and share ideas, make new connections and networks in order to advance their respective businesses.

CONNECT WITH INDUSTRIAL DECISION-MAKERS.

Make contact with industrial leaders from various domains notably the water sector and establish networks with over 100.000 participants and visitors from over 172 countries.

PROMOTE YOUR COMPANY AND LAUNCH YOUR NEW PRODUCTS EXCLUSIVELY.

Introduce your company as a leading entity in the sector and join a wide range of networks and partnerships.

FULLY INTEGRATED VENUES FOR EXHIBITIONS AND CONFERENCES.

All the conferences, exhibitions, and exhibitor's activities will be held simultaneously in the main Exhibitions Hall.

THE WORLD WATER COUNCIL – A TRUSTED INTERNATIONAL MULTI-STAKEHOLDER ORGANIZATION.

Established in 1996, The World Water Council has 260 member organizations from 52 countries across 5 continents. The Council has

been negotiating with global decision-makers that water should become a political priority for a sustainable and equitable development of the planet.

GLOBAL COVERAGE AND EXPOSURE FROM 2.000 JOURNALISTS AROUND THE WORLD.

Global journalists and their worldwide networks will cover the exhibitions as a part of the 10th World Water Forum through multiple communication channels.

PRESENTATION OF THE EXHIBITIONS

Expo

The Expo in 10th World Water Forum will be the platform for the companies and partners to display or present particular issues and challenges that are especially related to water and sanitation. It will also highlight the practical know-how, the technologies and Innovating breakthrough concerning water, the environment and the sanitation.

In addition, it will be a significant chance to bring the many key actors in the chain together (researchers, scientists, manufacturers, product and service providers, users, etc.) and to highlight the reactions and solutions to water and sanitation issues. And also, it will bring opportunities for sponsors and partners to promote themselves. The Expo could also concern the private-sector actors who support the 10th World Water Forum.

The Expo will include Country Pavilion, Partner Pavilion, Organization Pavilion, and last but not least Special Pavilion that will form the main Exhibitions of the Forum.

Country Pavilions

The "Country Pavilions" one of the Forum's novelties, will provide as an exhibition space for "Water World Forum" country member to showcase their cultural experience, information, and uniqueness on the concerns of difficulties, and challenges linked to water issues in their country, as well as the particular solutions to the issues of access to water throughout time.

It also will serve as a forum for discussions on dealing water issues in each their respective country in order to achieve the forum goals, and for the exchange interculturally about best practices and innovations.

In order to showcase the immersive cultural experiences and what make each country unique, the cultural, architectural, uniqueness and heritage aspect that emerged from the variety of geographical regions of the "Water World Forum" country member, are expected to provide inspiration for design of the Pavilions.

Partner Pavilions

The "Partner Pavilion" will be the platform for 10th World Water Forum partner (government and universities) to showcase the best innovations and world case expertise regarding issues of water and sanitation crises. These solutions will be presented from a variety of perspectives, including technological, institutional, political, technical, academical, and commercial interest.

It will also highlight the "Water for Shared Prosperity" projects as additional initiatives that are pertinent to the Forum's aims, that is a significant impact on people, and hasten the accomplishment of the Sustainable Development Goals (SDGs).

Organization Pavilions

Through a dedicated exhibition called "Organization Pavilions" the 10th Forum hopes to gradually merge education, entertainment, and excitement regarding worldwide water related issues while exploring thematic and Expo-owned pavilions.

Commercial company related to water environment, sanitation and security are expected to partake in this pavilion in order to them to showcase advancement of current innovations and solutions in the sanitation and hygiene area.

Special Pavilions

This exhibition space is for associations, communities to display their advancements, know-how, responses, innovations, technologies, projects, and future plans in water, sanitation, and hygiene.

It also serves as a space for promoting the nation in all of its diverse attributes. It will also serve as a forum for analyzing how local civil society and international organizations are solving the world's water-related challenges.

Fair

The Fair in World Water Forum will be an open venue for local Small and Medium Enterprises in Indonesia, Small and medium-sized enterprises (SMEs) play a crucial role in the economy of many countries around the world. SMEs can play an important role in addressing water-related challenges, which are a major concern discussed in the World Water Forum.

It will provides a platform for SMEs to showcase their technologies and products, and to network with other stakeholders, including policymakers, researchers, and investors, and also offers opportunities for SMEs to participate in discussions and debates on water-related issues, and to learn about new trends and best practices in water management.

It will create a festive yet reflective atmosphere at the Forum's main venue include a poster exhibition, a Learning Centre, networking spaces, side-events, water-related performances, a photo exhibition, and ethnic manifestations on water themes, amongst others.

OFFICIAL VENUES

Bali Nusa Dua Convention Center

Bali Nusa Dua Convention Center (BNDCC) will be the main venue of the 10th World Water Forum. BNDCC is a new and most sophisticated convention facility in Bali, located in a peaceful and secured world-class resort complex Nusa Dua with an 18-hole ocean view golf course, shopping complex, restaurants, and entertainment facilities. It is just 20 minutes from Bali International airport, Ngurah Rai, and has easy access to the rest of Bali's attractions and tourist sites.

Art Bali

Located in the Bali Collection area which is also a part of the Indonesia Tourism Development Corporation (ITDC) in Nusa Dua, Bali, Art Bali features traditional and contemporary artworks and cultural exhibitions.

Bali International Convention Center

Bali International Convention Center (BICC) is a convention center located in Nusa Dua, Bali. Spread over an area of approximately 169,000 m², BICC provides 26 meeting rooms, 1 auditorium and 2 ballrooms that can accommodate up to 10,000 people.

Kuta Beach

Located at 6 km north of Ngurah Rai International Airport, Kuta Beach is the most popular touristic spot in Bali. This attractive coastline is surrounded by 5-star hotels, restaurants, cafes and other public spaces.

Bali Collection

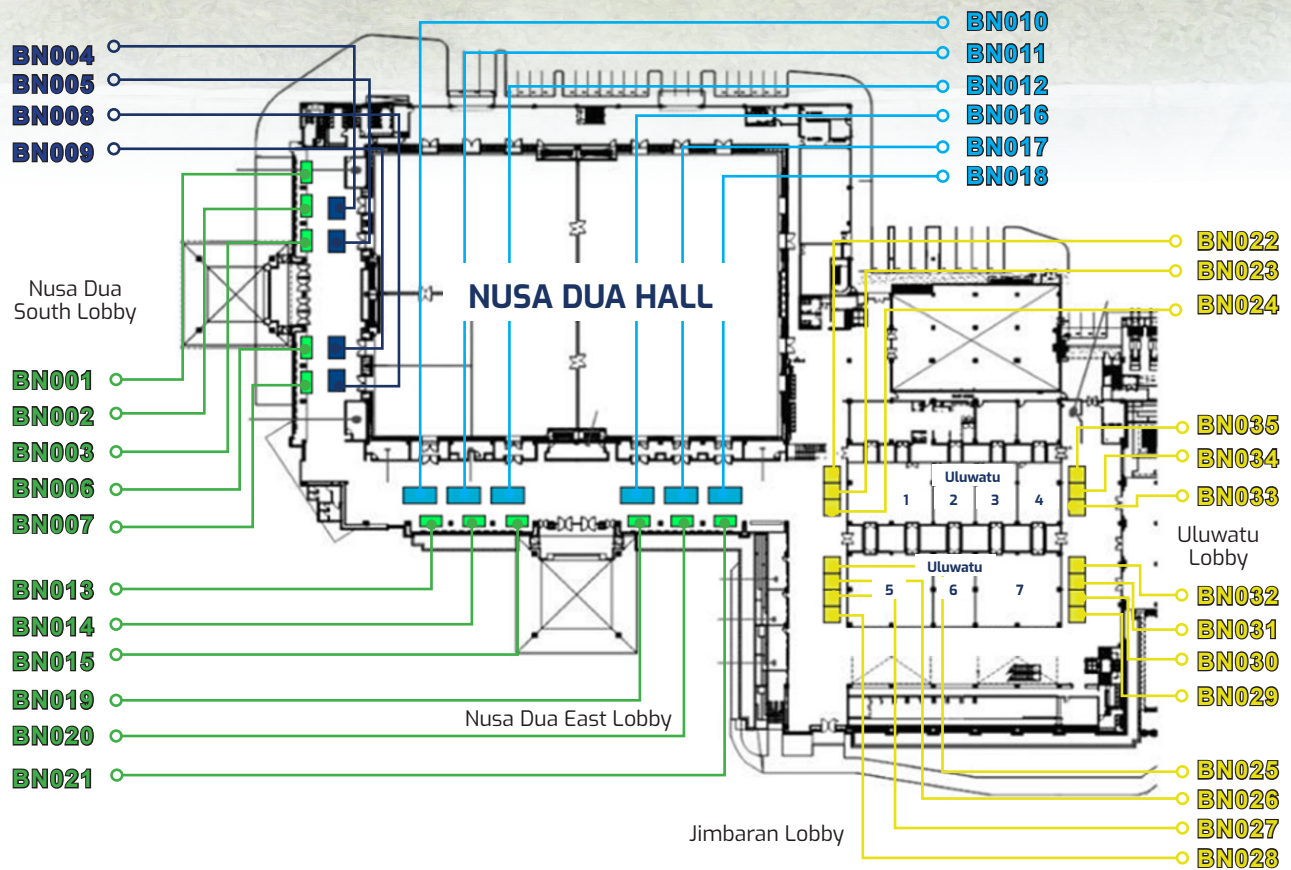

Bali Collection is the utmost touristic attractions and shopping centers in an exclusive tourism area Nusa Dua, Bali. This top-notch destination is covering an area of 8 hectares and surrounded by 5-star hotels.

Exhibition Participation Fees

Exhibitors will have the option between two Booth.

Raw Space

Exhibitors have the opportunity to secure an empty space for their participation and are entitled to engage their own contracted booth builders or contractors. However, it is important to note that these booth builders or contractors must undergo an approval process by the Executive Secretariat of the Forum. Once approved, they are required to adhere to the design specifications and guidelines set forth by the secretariat, as well as comply with the Fair and Expo manual released by the World Water Forum Secretariat.

Standard booth

The standard booth option provides exhibitors with the convenience of having their booth space already constructed by the World Water Forum. When opting for the standard booth, exhibitors pay for a designated booth space and receive a pre-built booth setup. The booth size requirement starts at a minimum of 4 square meters. A standard booth package is available, The package includes provisions such as carpeting for the rented area, modular partitions, lighting, electrical distribution, and other things.

Illustrated Design of 9 Sqm standard booth

The table below lists the prices for partaking in the exhibition (Sqm rent), sorted down by the type of space rented (raw space or standard booth) and the booking period (early-bird or standard):

CATEGORY	RAW SPACE/SQ.M		STANDARD BOOTH/SQ.M	
	EARLY BIRD	NORMAL RATE	EARLY BIRD	NORMAL RATE
Country Pavilion (Country Member)	IDR 7,500,000	IDR 8,500,000	IDR 8,500,000	IDR 9,500,000
Organization Pavilion (Commercial Company)	IDR 6,500,000	IDR 7,500,000	IDR 7,500,000	IDR 8,500,000
Partner Pavilion (Government and University)	IDR 6,000,000	IDR 7,000,000	IDR 7,000,000	IDR 8,000,000
Special Pavilion (Association, Community, NGO)	IDR 4,000,000	IDR 5,000,000	IDR 6,000,000	IDR 7,000,000
Fair (Small to Medium Enterprises)	IDR -	IDR -	IDR 2,000,000	IDR 2,000,000

Payment Methods

To secure booth space for the Fair and Expo at the World Water Forum, interested participants are required to make reservations through the designated website developer. Booth space can be secured by visiting the following address: <https://worldwaterforum.org/exhibition>

1. Down payment equivalent to 75% of the total booth price must be paid within 15 days after the invoice is issued to confirm your reservation.
2. Your preferred booth space is reserved upon receipt of the invoice, and you have a 15-day period to make the down payment. If the down payment is not received within this timeframe, your preferred booth space will be released and made available to others.
3. The early bird phase refers to the payment period preceding November 31st, during which a discounted booth price is offered. Subsequently, following this deadline, the booth price will revert to the normal rate.
4. In order to retain the "early bird" special price, it is mandatory that the remaining 50% of the total cost is paid prior to November 31st. Should this deadline be missed, the price will be reverted to the standard rate.
5. February 28 is the Final deadline for booth reservations. To guarantee the reservation of your booth space, full payment must be made by this date. Any unconfirmed reservations after February 28 will be released and offered to participants on the waiting list. To secure your participation in the event, it is highly recommended to finalize the payment process before the specified deadline.

WITHDRAWAL METHODS

The reimbursement policy for booth space (raw space or standard booth) is structured as follows:

1. Prior to December 31, 2023: A reimbursement of 50% will be granted based on the initial deposit received upon confirmation of the reserved space or furnished stand location.
2. From January 1 to February 28, 2024: A reimbursement of 25% will be provided, calculated on the deposit received. This timeframe coincides with the deadline for payment of the full amount for the space or equipped stand rental invoice.
3. After February 28, 2024: No reimbursement will be applicable, and the total amount paid will not be refunded. This
4. In the event that the World Water Forum Secretariat cancels the Fair and Expo for any reason, full reimbursement will be issued. This means that participants will receive a complete refund of the amount paid for the booth space, whether it was raw space or a standard booth. This policy ensures that participants are protected in cases where the cancellation is beyond their control, providing them with financial security and peace of mind.
