10TH WORLD WATER FORUM

WATER FOR SHARED PROSPERITY

18-25 May 2024 | Bali, Indonesia

Table of Content

01. GREETINGS	01
02. WORLD WATER COUNCIL	07
03. THE 10 TH WORLD WATER FORUM	15
04. FORUM PROCESSES: EXPECTED OUTCOMES	181
05. THE VENUE	189
06. GENERAL INFORMATION	221
07. FIELD TRIP	237
08. BALI AT A GLANCE	243

01

Greetings

Joko Widodo

President of the Republic of Indonesia

Sustainability of water resources has become a pressing issue for the world. Global water needs have increased sharply, in line with population and industrial growth. Meanwhile, the availability of quality and sustainable water is increasingly difficult due to environmental degradation and climate change.

Indonesia is very pleased to host the 10th World Water Forum in Bali in 2024 with the World Water Council. There are many substantial issues to be prepared for this peak event to find solutions, innovations and joint actions for implementation as soon as possible.

These agendas must be addressed as joint efforts, through community participation and support from various stakeholders, as well as dialogue and partnerships between countries in the spirit of togetherness for the welfare of the global community.

Loïc Fauchon

President of the World Water Council

We have chosen the simple motto “water for shared prosperity” for this 10th Forum. This obligation to share in order to achieve abundance, peace, and serenity. However, sharing necessitates possessing, protecting, safeguarding, and respecting.

This is what we want to say: “spare to share,” “spare water to share prosperity.” Let us save water in order to share its benefits, its presence, its quantity, and its quality. There is a sentence in every language and religion that says “water is life.”

And the Bali World Water Forum is reaching out to us to change the course of water history, to write its future of abundance in order to achieve shared prosperity.

Luhut Binsar Pandjaitan

Coordinating Minister of Maritime and Investment Affairs,
Republic of Indonesia

Water is one of the core essential and basic necessity. In recent years, water table is facing serious threat due to rapid population increase, industrial and urban development, over usage, climate change, global warming, shrinkage in glaciers in Arctic and Antarctic, natural calamities, and negligence of people to use the water in proper way and slow replenishment of natural waters. More than 650 million people in almost 40 countries suffer from water scarcity.

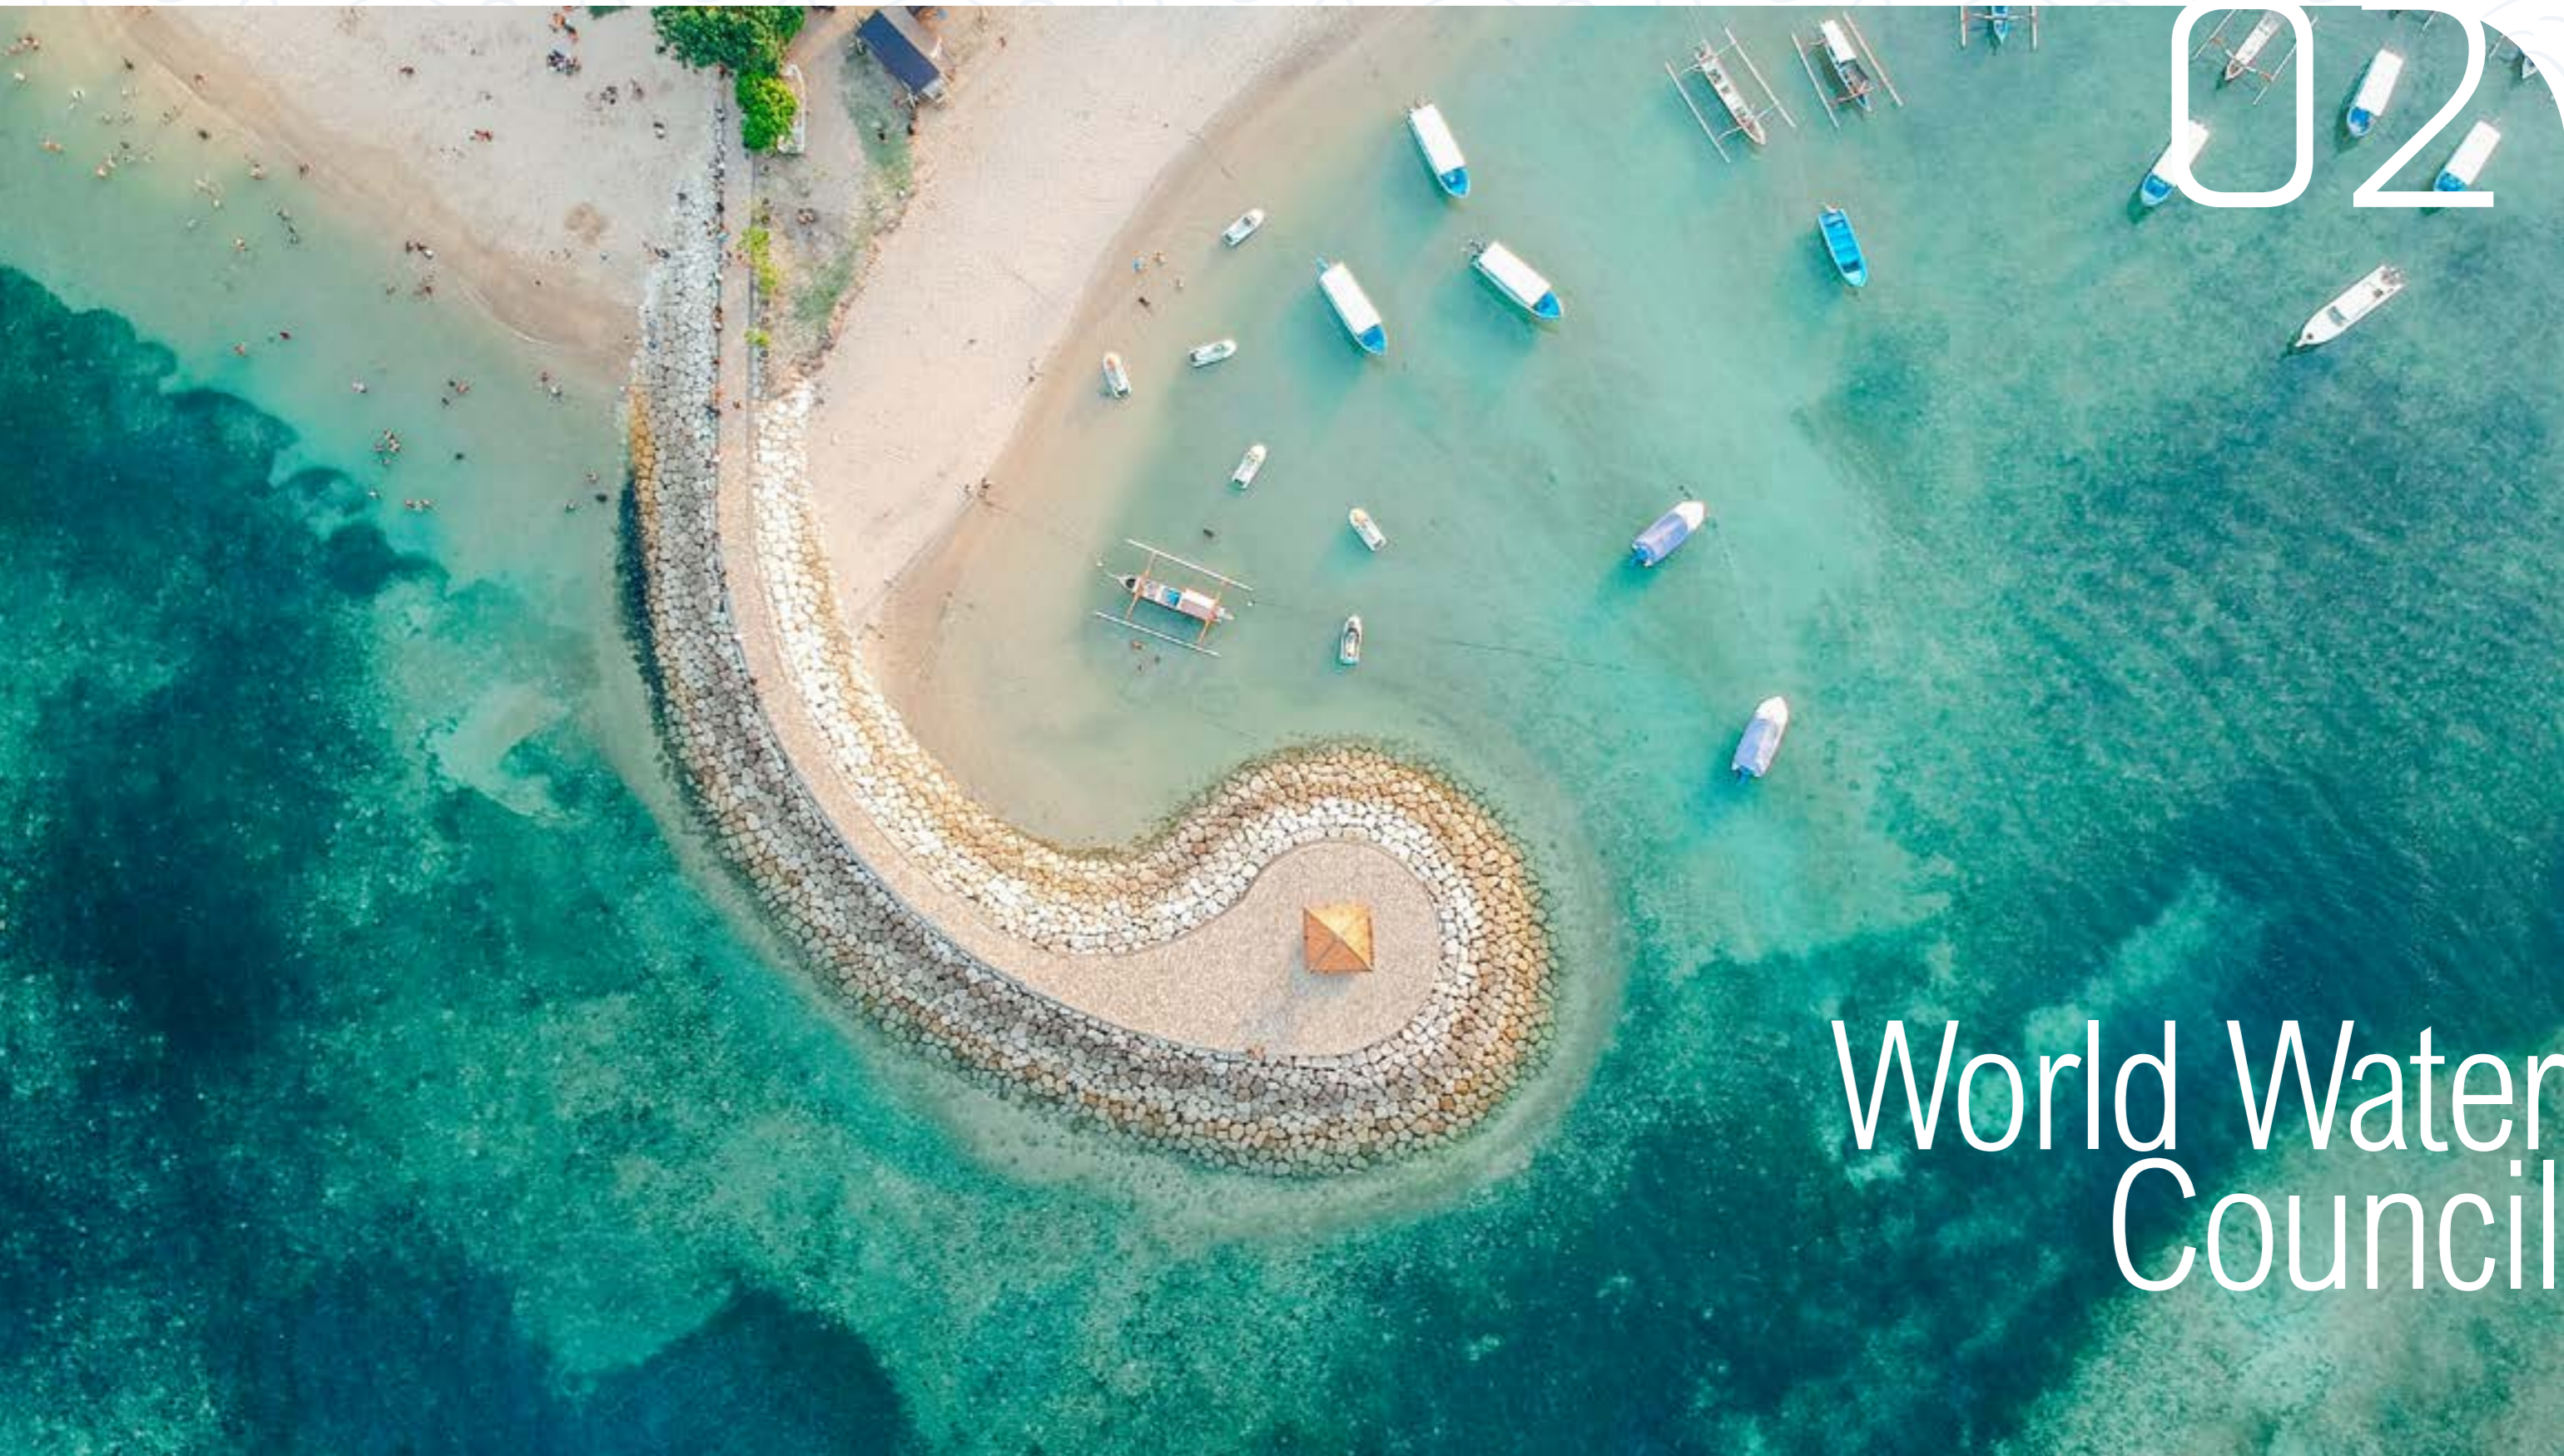

The 10th World Water Forum co-hosted by the Government of Indonesia and World Water Council provides a unique platform where the water communities and key decision makers can collaborate and make long-term progress on global water challenges.

The Forum brings together participants from all levels and areas, including politics, multilateral institutions, academia, civil society and the private sector, among others. We have to use this momentum to strengthen our ability in tackling various challenges in providing clean and fair water for all.

02

World Water Council

■ What is the Role of World Water Council

TOGETHER WE MAKE WATER A GLOBAL PRIORITY

World Water Council is an international multistakeholder platform organization whose mission is to mobilize action on critical water issues at all levels, including the highest decision-making level, by engaging people in debate and challenging conventional thinking. The Council focuses on the political dimensions of water security, adaptation and sustainability.

The World Water Council is an international multi-stakeholder organization, created in 1996 and based in Marseille. Its working languages are English and French. Has 260 member organizations, which come from 52 countries across 5 continents.

The World Water Council's mission is to gather the international community to convince decision-makers that water is a political priority for the sustainable and equitable development of the planet.

The Council focuses its activities around 3 main areas:

01.

Mobilize political action and hydrodiplomacy

To mobilize political action in order to secure the right to access water and sanitation for all. To promote hydrodiplomacy to contribute to peace and sustainable development in the world.

02.

Promote water security

To promote concrete answers and field responses to improve knowledge, finances and governance.

03.

Organize the World Water Forum

To catalyze collective action for water and gain concrete results

What is World Water Forum

The Largest international forum in the water sector involving various stakeholders, which has been invented by the World Water Council.” The Forum is held every three years and has been taking place since 1997. The World Water Forum is not just a conference: it includes a three-year preparation phase (preparatory phase), a one-week event (event phase), and a presentation of the results (synthesis phase) with ongoing support for collective action.

The Forum brings together participants from all levels and areas, including politics, multilateral institutions, academia, civil society and the private sector, among others. Over the years, the number of people participating in the Forum has grown from a few hundred to tens of

thousands, from both the international community and host countries.

The Forum provides a unique platform where the water community and key decision makers can collaborate and make long-term progress on global water challenges. The Forum brings together participants from all levels and areas, including politics, multilateral institutions, academia, civil society and the private sector, among others.

Over the years, the number of people participating in the Forum has grown from a few hundred to tens of thousands, from both the international community and host countries. Building on this momentum, the Council encourages you to join the Forum’s efforts and strengthens the ability of the entire world to respond to water related challenges of our times.

In collaboration with the World Water Council, Indonesia will organize a World Water Forum on 2024. The World Water Forum shall be a multi- stakeholder event to present the mission, views and achievements of the water community.

The main objectives of the World Water Forum are:

1. To raise the importance of water on the political agenda;
2. To raise awareness among decision-makers, water and other professionals, the media and the public at large on world water issues of critical concern;
3. To support the deepening of discussions towards the resolution of international water issues;
4. To provide a platform to exchange views, information and knowledge on current issues and information related to global water;
5. To present the knowledge on global water assessment, challenges and potential solutions;
6. To generate political commitment for the improvement of water management.

The World Water Forum shall aim as much as possible to bring all stakeholders from various geographical and sectoral backgrounds together for open debate.

WORLD WATER FORUM

03

THE 10TH WORLD WATER FORUM

10th World Water Forum

The World Water Council represents a multi stakeholder platform devoted to the advancement and resolution of key water issues requiring the involvement of governmental, scientific, technical, and advocacy representatives. The credibility of the World Water Forum vitally depends on the involvement of a wide diversity of stakeholders from the entire world without discrimination and with the freedom of expression and opinion of all-both in the preparatory process and at the event.

In this regard, Indonesian as a co-host for the 10th World Water Forum, which highlights water occurrences in Indonesia Archipelago, has an important role in the matter of water to support the needs of 260 million people, industries, and irrigation needs of a country composed of more than 17,000 islands with 1,922,570 square kilometers of land area and 3,257,483 square kilometers of sea.

Indonesia Archipelago

The World Water Forum should advance the aims of the World Water Council and the world water community in addressing challenging water issues. The Forum should accomplish this by facilitating and promoting a multifaceted discussion and debate open to all stakeholders before and during the Forum, resulting in political mobilization, a broader awareness of water management issues and actions to solve those issues.

The World Water Forum, thus, aims to:

- Engage stakeholders in mobilizing debate on and action for water, open to all parties in developing a shared vision;
- Provide a platform for all stakeholders to exchange, learn, develop partnerships and catalyze concrete actions for improved water resources and services development and management;
- Engage policy and decision-makers in a dialogue to establish commitments for improved water resources and service development;
- Increase awareness for water issues towards the public-at-large, in particular through the media; and
- Encourage innovative ideas and tools outdo contemporary water solutions into action.

To support the objectives of the World Water Council, the Forum, and the world water community.

The Forum is made up of the following primary components:

- The Thematic Process provides the substantive underpinning of the World Water Forum;
- The Political Process provides the opportunity for discussion amongst and with elected officials at all levels (head of government, ministerial, parliamentarian, river basin authorities);
- The Regional Process provides perspectives on water from all regions of the world;
- The Fair and Expo provide a space for all stakeholders to showcase their contributions;

In addition, other events are organized throughout the preparation period and during the World Water Forum event, offering additional opportunities for all stakeholders to meet, learn, debate and present issues, policies and state-of-the-art solutions for efficient and sustainable water resources and services management and to communicate this to a worldwide audience.

The 10th World Water Forum will take place in Bali, Indonesia from 18 to 25 May 2024, provides a unique platform where the water community and key decision makers can collaborate and make long term progress on global water challenges.

The forum will be the place for the stakeholders participating in the political, thematic, and regional processes to bring interim results of the discussion of each working group and plan for the forum week and beyond with a developed agenda.

This gathering aims to have updated exchanges of detailed political, thematic, and regional issues and to have in-depth discussions with process working groups how to plan forum week with final deliverables, including follow-up actions after the forum.

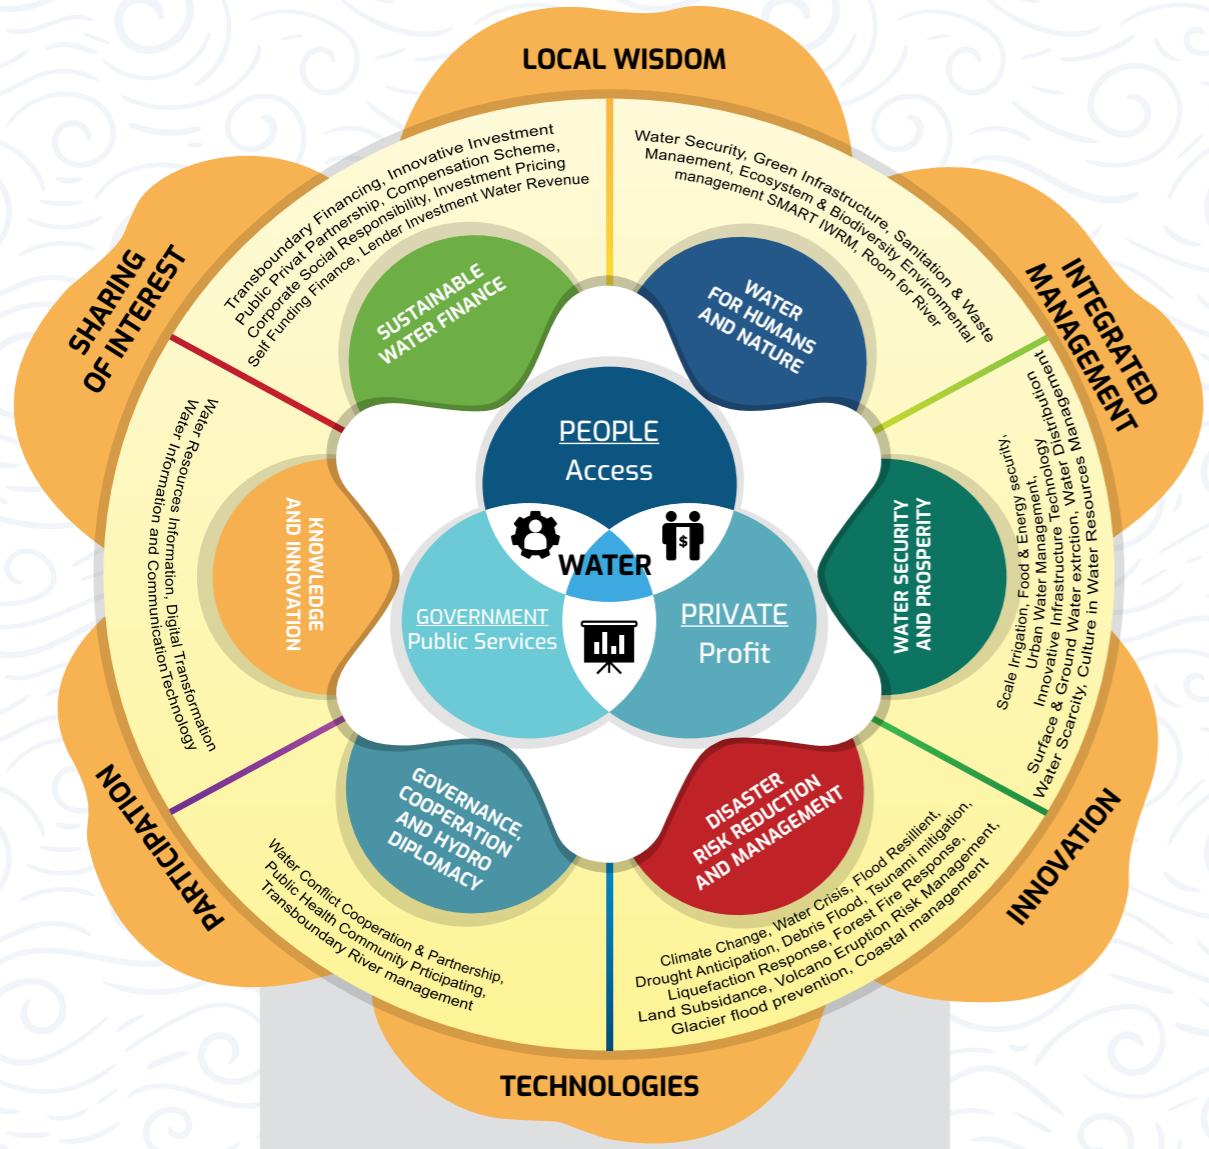

WATER FOR SHARED PROSPERITY

With a good water management, we can achieve prosperity together, and for all. Water plays central role to achieved shared prosperity.

The importance of water has a high position in human cultures, we realize that water is essential for human live since ancient time. From daily consumptions, purifications, conservations, cultivations and so on, even some view water as the live itself and the source of immortality.

Nowadays, water management often become the main issues in international events and declarations, including the Sustainable Development Goals (SDG's). The SDG's put a goal that must be achieved in 2030 to ensure the sustainable living.

The importance of water is specially mentioned in the SDG's number 6, Clean Water and Sanitation for all, where the subgoal elaborates in detail. In order to achieve those targets, all stakeholders need to works together and understand each other needs. With a good water management, we can achieve prosperity together, and for all. Water plays central role to achieved shared prosperity. In the 10th World Water Forum, we hope that we can give the societies what its need to achieve shared prosperities through solving and understanding water related issues.

- MAIN PLAYERS OF THE FORUM:**
- International Organizations,
 - Government
 - Academia
 - Civil Societies including the youth
 - Private Sector

- MANAGING WATER TOGETHER WITH THE AIM OF PROSPERITY FOR ALL THROUGH:**
- INTEGRATED MANAGEMENT
 - CONTINUOUS INNOVATION
 - LATEST TECHNOLOGIES
 - ACTIVE PARTICIPATION
 - SHARING OF INTERESTS
 - LOCAL WISDOM

Water Security and Prosperity

The topic of water security, and related prosperity, is one of the most critical our world has been facing for decades and water insecurity is becoming a growing threat in a world that is rapidly changing due to the impacts of population growth, unsustainable development, raising inequality and climate change, and the ensuing increasing competition over water resources.

Topics to be addressed during the next World Water Forum, and which require more overall political attention as we move closer to 2030, to achieve SDG 6 and other related SDGs, are the following:

1. Sound water supply and demand management (including prioritizing water savings and efficiency measures, water services delivery and pricing, cost recovery, development and improvement of water balance system from local to national level, surface reservoir, sustainable ground water resources, etc.) in the context of domestic water usage and human settlements, balancing urban, rural and industrial development with available surface and ground water resources.
2. Circular economy in the water sector and non-conventional water resources (e. g. WWT recycling and reuse, rainwater harvesting, desalination, constructed wetlands, artificial aquifer recharge, solar pumps, etc.)
3. Water for food/agriculture (virtual/embedded water, irrigation modernization and efficiency, drought resilient crops, regenerative agriculture, commodity pricing, agricultural subsidies, food estate, etc.)
4. Water for energy (hydropower, including dams and reservoirs; biofuels; hydrogen production by electrolysis; cooling of nuclear and thermal power plants; etc.)
5. Water insecurity and development (climate change and water-related impacts, e.g., economic and social vulnerability, competition over water resources, food insecurity, migrations (urban), political instability etc.)

Water for Humans and Nature

Water is a critical resource for all life on Earth, both for humans and nature. We depend on healthy, functioning ecosystems for our water security. They provide us with a plethora of goods, services and wellbeing. The degradation or destruction of freshwater ecosystems inevitably leads to acute problems affecting aquatic biodiversity but also our livelihoods and health.

Topics to be addressed during the 10th World Water Forum, and which call for increased political attention as we move closer to 2030, to achieve SDG 6 as well as SDGs 2, 14, and 15, are the following:

1. Water quality improvement (reduction and remediation of biological, chemical, plastic, and other types of water pollution, addressing point and diffuse sources of pollution, etc.) for the reduction of environmental pollution and related health issues (including viral epidemics, cholera, malaria)
2. Conservation and restoration of freshwater ecosystems and biodiversity (including Nature-based Solutions, protection and restoration of aquatic biodiversity and ecosystems), protection and restoration of aquatic biodiversity and ecosystems, including river, lakes and wetlands, respect the right of rivers to survive in nature, develop river ethics, protect river's healthy life and achieve a harmonious coexistence between human and river.
3. Better access to safe drinking water for all (guaranteed water rights, inclusivity in accessing water for all gender, children, and more vulnerable group, water services management etc.), including in fragile contexts and humanitarian settings
4. Access to water sanitation and hygiene (WASH) for all, as a key human right, including wastewater and solid waste-treatment infrastructure development and hygiene services in urban or smaller human dwellings and off-grid solutions for, e.g. more remote rural populations or refugee settlements

Disaster Risk Reduction and Management

As extreme weather events – floods, droughts, heat waves, storms, etc. – due to the changing climate – are becoming increasingly frequent and destructive, and most are linked to the hydrological cycle, Disaster Risk Reduction and Management is a crucial topic to be discussed at the 10th World Water Forum. Moreover, Indonesia, the host country of the next Forum, is frequently struck by water related disasters, and particularly by floods and cyclones, and gives high priority to this issue.

Topics to be addressed during the next World Water Forum under this theme are the following:

1. Integrated flood prevention and management policies and programs (mitigation of extreme weather events, flood control projects, floodwater management, coastal zone protection, dam sedimentation, early warning systems, etc.)

5. Integrated Water Resources Management, including Integrated River Basin Management (IRBM), Water-Energy-Food-Health-Ecosystems inter-linkages, Integrated Coastal Zone Management (ICZM), Source to Sea, Integrated hydrology, hydrogeology, hydro-oceanography, and hydrometeorology, Integrated surface and groundwater management, atmospheric water movements (see Global Commission on the Economics of Water report) and other cross-sectoral or cross-cutting approaches.

2. Drought prevention and management policies and programs (adaptation plans, drought-resilient crop selection, restoration for peatland and mangrove, etc.)
3. Application of Eco-DRR in the Water sector, including policy or regulatory measures, prevention mechanisms, and best practices of ecosystem-based DRR approaches (e.g. flood plain and mangrove restoration, green infrastructure to reduce heat stress, “sponge cities” approach), etc.
4. Climate, enhancing sustainability and improving the resilience of water infrastructures to extreme weather events.
5. Early warning systems for all and Emergency response mechanisms, including preparedness plan and disaster scenario analysis, to cope with water-related disasters, reduce people's and infrastructure vulnerability and better prevent humanitarian/refugee crises and migration.

Governance, Cooperation and Hydro-diplomacy

Good water cooperation amongst global actors as well as sound governance within the water community and beyond, including governments, international organizations, think tanks, civil societies and other stakeholders, are vital to overcome the growing competition over water resources, improving mutual understanding and identify acceptable trade-offs between all water users, including other sectors. Hydro diplomacy and international negotiations, notably based on legal instruments, are good means to foster peace mediation and conflict prevention.

Topics to be addressed during the upcoming World Water Forum, and requiring utmost political attention as we move closer to 2030, so as to achieve in particular SDGs 6 and 17 are the following:

1. Enhance international collaboration at all levels (including multilateral, bilateral, North-South, South-South, North-North), transboundary and cross-border cooperation as appropriate on rivers, lakes, wetlands, small islands, and groundwater aquifers, etc.
2. Foster decentralized cooperation between river basin commissions, regional entities, local authorities, local communities, corporate social responsibility, etc.
3. Strengthen cross-sectoral dialogue and cooperation (e. g. between water, energy, food, industrial and environmental sectors)
4. Ensure active stakeholder involvement and public participation (including from other sectors) in water management at all level
5. Develop and enforce transparent and accountable institutions and legal frameworks, and promote integrity and strengthen equity at all levels and amongst all players, including gender equality, youth involvement, and respect of minorities' and local communities' rights.

Sustainable Water Finance

The lack of funding for water is another crucial issue to address, as millions of people throughout the world still suffer from insufficient access to clean water and sanitation, unreliable or unavailable water supply, and increased exposure to water-borne diseases and water-related disasters induced by climate change. Rapid urbanization creates additional challenges for water supply and sanitation in very densely populated areas, meanwhile leaving rural and natural areas behind.

There is hence a need for more innovative, flexible, sustainable and efficient approaches to water financing, including enhanced public-private partnership. Topics to be addressed during the 10th World Water Forum in Bali, and highly relevant to the successful achievement of SDGs 1 and 6, are the following:

1. Revisit the existing international water financing architecture by promoting a “new economics of water” approach with an emphasis on transparency, accountability, fairness, and equity.
2. Promote innovative and sustainable funding, financing, and delivery mechanisms (guaranteed investment and water services pricing e.g. Blended finance, Payments for Ecosystem Services)
3. Secure and increase funding for basic access to safe water and sanitation for all at all scales as a human right, focusing on developing countries or fragile communities.
4. Special schemes and incentives to promote green finance (e.g. nature-based solutions, green infrastructures, ‘Green Water Credits’, Circular/Blue/Green, etc.)
5. Secure and Increase funding to prevent and overcome water-crisis, water disasters and enhance climate resilience (e.g. Endowment Funds, Climate/Water Funds, Disaster Contingency Funds, etc.)

Knowledge and Innovation

Scientific progress and technological innovation are rapidly advancing in the water sector, with new tools, instruments and methodologies available. This wealth of knowledge, as well as traditional and indigenous know-how, needs to be shared, taught, made broadly available and scaled up to help address the growing water challenges the world community is facing. As we move closer to 2030 and aim to successfully achieve SDGs 4 and 6, the following Topics could be addressed and receive the necessary attention at the 10th World Water Forum:

1. Promote Smart Water Management and technological innovation(e.g. digital transformation, biotechnology, and artificial intelligence).
2. Promote innovative organizational approaches (e.g. new governance structures and mechanisms, policy measures, data, and information governance, data sharing, etc.) and strengthen the Science to policy interface on sustainable water resource management.
3. Respect and value indigenous, traditional, and community-based knowledge systems and promote integration of their practices into existing water management policies.
4. Upscale water information systems (Systematic Observation and database management, integrated monitoring and assessment of water resources - including ocean water, surface water, groundwater-, of water uses, of water service prices, performance assessment of water services and management plans, etc.).
5. Enhance access to education and training on water and 3H (hydrology-hydrometeorology-hydrogeology), notably on new concepts (e.g. water as a global common good, environmental economics, atmospheric rivers, virtual water, water footprint, etc.).

The 10th World Water Forum will be the place for the water-related multi-stakeholders participating in the forum processes (Political, Thematic, Regional) to bring interim discussion results within each process working group and design the Forum week with more concrete ideas for action and beyond. All participants will discuss each Forum process and further activities that will be interlinked based on updated agenda and topics, political commitments, and action plans for **'Water for Shared Prosperity'**.

Developing Forum Process with an in-depth discussion of process working groups

Political Process: Developing a concept and roadmap for each segment and discuss strong commitment with expected deliverables from each segment.

Thematic Process: Developing a concept of Topics and Sub-themes with detailed issues to discuss tentative session topics based on discussion within the respective working group by having breakout sessions.

Regional Process: Discussing and developing Sub-regional and Regional concepts with practical cases and local issues, which will be tentative session topics during the Forum by having regional breakout sessions.

Making interlinkage between themes, regions, and three processes

Interaction between Sub-themes of the Thematic process and Thematic initiatives.

Interaction between each region of the Regional Process and Regional initiatives.

Discussion on Process Interlinkage focusing on thematic and regional substance into the Political commitment and action.

Planning further actions and designing final deliverables for the Forum

Political Process :
Commitment or Action Agenda/Declaration

Thematic Process :
Sub-theme, Topic, Session Report

Regional Process:
Regional Report, Showcase (Local/Regional practices)

Designing follow-up actions after the Forum

Discussion on the follow-up action and dialogues of the 10th World Water Forum

Balinese Water Purification Ceremony

Water plays a crucial role in daily life and holds profound significance for the Balinese. In Hindu beliefs, water is not just a source of physical life but also holds a sacred function in various religious ceremonies known as Tirta or holy water.

Delegations from participating countries will have the opportunity to experience the enchanting Tumpek Uye and Segara Kerthi ceremony, a profound purification ritual that venerates the boundless depths of the ocean and pays homage to the harmony of the universe, flora, fauna, and their habitats.

This event will take place on May 18, 2024 at Kura Kura Bali (Bali Turtle Island Development) which is designed as an integrated economic environment to support many businesses and communities. Aligning its practices with the Sustainable Development Goals (SDGs), the Special Economic Zone ensures the embodiment of environmental responsibility including the green building certification, nature-infused connectivity, green transportation advocacy, etc.

Come join us for the Balinese Water Purification Ceremony under the theme of “Caring For Water, Protects Sarwa Prani” for a wonderful opportunity to connect with nature, culture, and the community.

Welcoming Dinner

The Welcoming Dinner will be held on May 19, 2024 at Garuda Wisnu Kencana (GWK) Cultural Park and GWK Lotus Pond.

The harmonious sound of the gamelan and the magnificent performances of the famous Indonesian musicians and dancers will welcome the distinguished guests to the gala dinner, where the exquisite Indonesian cuisine will be presented.

The Welcoming Dinner kicks off with a Balinese dance that embodies the value of water for the Balinese: a deep spiritual and cultural meaning. It is a symbol of change and transformation, the beginning of the chain of life.

The invited guests will also witness the dramatic and breathtaking performances of contemporary, modern and traditional dance configurations and colossal acrobatics combined with visual performances on cliffs and floors. Each sequence of the performance is taking up the four elements of the theme “Water for Shared Prosperity”, in particular the power of water, water as the source of life, acting in harmony and shared prosperity.

Enjoy the panoramic views of the surrounding area, the enchanting music and the cultural performances while savoring the unparalleled dining experience. To complete the evening, a dazzling fireworks display will decorate the night sky above the majestic cultural park.

By Invitation

Opening Ceremony

The President of the Republic of Indonesia will welcome the arrival of the Heads of States/ Governments to the Opening Ceremony of the 10th World Water Forum which will take place on May 20, 2024 at Bali International Convention Center (BICC), Nusa Dua.

The Opening Ceremony will begin with a collaborative performance of orchestral music, dance, and choir, consisting of three sequences of Mother Nature, Voice of Resilience and Shared Future Prosperity.

This will be followed by the announcement and awarding ceremony of the King Hassan II Grand World Water Prize with the presence of the Moroccan Minister of Equipment and Water, the opening remarks by the President of the World Water Council and the President of the Republic of Indonesia.

The Opening Ceremony will also be attended by world leaders and delegates from leading countries in the water sector.

By Invitation

Leaders Visit

Mangrove Forest Rehabilitation and Conservation Area of the Ngurah Rai Forest Park (Tahura Ngurah Rai) in Denpasar, Bali serves as the venue for the visit of the Heads of State of the 10th World Water Forum, which will take place on May 20, 2024.

Tahura Ngurah Rai, the extensive green area that stretches like a green belt around the land on the coast from Denpasar to Badung, covers a total area of 1,373.5 hectares. Over 25 species of mangroves can be found here, including 17 true mangrove species such as Avicennia, Rhizophora and Sonneratia. Visitors can immerse themselves in the beauty of nature and the contrast between the bright green color of the mangrove forest and the round pavilion that connects the brown wooden bridge.

Located within Bali’s tourism center, which includes Sanur, Kuta, and Nusa Dua, this delightful forest with its abundance of pure and fresh air is an ideal destination for leisure activities, ecotourism, educational trips and research purposes.

During the Leaders Visit of the 10th World Water Forum, the delegates will continue the mangrove planting initiative, which was launched at the Leaders Retreat of Heads of State on the occasion of the G20 Summit in 2023.

Political Sessions

The Political Process of the World Water Forum encompasses five segments, each with distinct roles and expected outcomes.

- The Head of States segment underscores the pivotal role of national leaders in raising awareness, providing political support, and influencing policies on water-related issues globally.
- The Ministerial Process involves government bodies advocating for national priorities, networking, and committing to action, enhancing capacity and collaboration in water governance.
- Local and Regional Authorities focus on advocating for local water needs, building partnerships, and influencing policies at the community level, promoting effective local water governance.
- Parliamentarians share experiences in crafting water-related legislation, prioritize water in budget discussions, and foster partnerships, contributing to robust water governance frameworks.
- The Basin segment, introduced at the 9th World Water Forum, emphasizes dialogue among stakeholders involved in basin-level water management, supporting commitments to multi-stakeholder dialogue and good governance models. This segment aligns with the Forum’s aim to achieve the Sustainable Development Goals, particularly SDG 6, through effective basin management, complementing regional and thematic processes.

Thematic Sessions

The Thematic Process provides the substantive underpinning of the World Water Forum. The process will be structured with Main Theme, ‘Water for shared Prosperity’, Six Sub-themes, and Five topics per each sub-theme to share best practices and experiences on those priorities.

The Forum operates the thematic process to develop cooperative methods and partnerships on the specified technical and political solutions. The outcomes of the process eventually influence the policy-makers to apply better solutions and facilitate stakeholders to commit for actions. Participants of the Thematic Process are expected to develop and facilitate the implementation of action plans with tangible solutions to imminent water challenges.

Regional Sessions

The Regional Process plays a crucial role in organizing the World Water Forum by giving diverse regions a platform to address common challenges and solutions. It ensures that regional voices and priorities are heard, enriching the understanding of global water issues.

Unlike the Thematic Process, which focuses on theoretical approaches, the Regional Process delves into local and regional case studies and practices. It recognizes that priorities vary across regions and emphasizes the importance of tailored solutions. By linking with other processes, it highlights the significance of regional perspectives in shaping policies and sharing knowledge. The 10th Forum aims to strengthen regional processes, promoting localized action plans and practical solutions for water management issues, drawing on the experiences of stakeholders from different regions.

High Level Panel

The High-Level Panels (HLPs) of the 10th World Water Forum aim to foster conversation on the highest global water priorities, engaging a diverse range of leaders from water and water-related sectors with the goal of catalyzing full-fledged actions. The HLPs encompass the three pillars of the Forum —Thematic, Regional, and Political processes—, thus capturing the multi-faceted nature of global water priorities.

HLP sessions were proposed through the preparatory procedure of the Forum by the Thematic and Regional Process working groups as well as by the expert groups in and outside of the water community. The final selection has been made by the different Processes working groups and the co-hosts of the Forum, considering the relevancy, urgency, and universality of each proposal.

Session Code	List of HLPs
HLP 1	Proposing the Establishment of the Global Water Fund
HLP 2	Climate-Water-Energy-Food-Ecology System of Systems
HLP 3	Global water governance: What’s next?
HLP 4	Reimagining the Role of Finance in Collective Action
HLP 5	Navigating the Source-to-Sea Journey: Advancing Prosperity Across the Entire Water Cycle
HLP 6	Hydro-diplomacy and peace
HLP 7	The role of the private sector in meeting the goals of SDG6
HLP 8	Status of Early Warnings for All (EW4All) initiative
HLP 9	Towards a Global One-Health Approach in Public and Environmental Monitoring
HLP 10	Worldwide Observatory for Non-Conventional Water Resources & Renewable Energy
HLP 11	Nature for Water: the business case for nature to deliver value for water security

Session Code	List of HLPs
HLP 12	Integrated Water Resources Management (IWRM) on Small Island
HLP 13	Urgent call to save our Lakes: Promoting Global Agenda and Collaborative Efforts for Sustainable Lake Management and Raising the World Lake Day
HLP 14	Blended Finance for Global Sustainable Water
HLP 15	Bandung Spirit Water Summit - A New Political Corridor to Achieve SDGs Through Water
HLP 16	Water for Shared Prosperity: Quiescent or Jump Through Hoops?
HLP 17	High-level Panel of the Roundtable on Financing Water: How can financing support water justice?
HLP 18	Moving the Water Action Agenda forward together
HLP 19	Paddies for the Planet and People
HLP 20	Water Information Systems

Special Sessions

The Special Sessions at the 10th World Water Forum offer a unique platform that complements the regular sessions without overshadowing them. They provide fresh opportunities to engage with topics inside and outside the water sector, highlighting particular importance that are not addressed in the main program. These sessions explore emerging global issues relevant to water, addressing critical policy agendas and presenting practical solutions to water challenges.

Special Sessions prioritize innovative methods of interaction and ensure inclusive dialogues involving diverse stakeholders from various backgrounds and regions, fostering collaboration and meaningful contributions.

Session Code	Session Title	Organization
SS1	National Water Roadmaps towards the 2030 Agenda	AquaFed
		Mediterranean Water Institute (IME)
		FAO
SS2	From Pledge to Impact, Leveraging MDBs Water Finance	WWC
		UNESCO
SS3	Socially inclusive and just water management	UNESCO
SS4	Money for honey (trucks): Financing a global wastewater and environmental water surveillance system in a One-Health approach	SUEN
		European Commission
SS5	One Water Summit Second International Steering Committee	One Planet Summit General Secretariat
SS6	Empowering Solutions for Egypt's Water Challenges through Scientific Applied Research	National Water Research Center (NWRC)
SS7	The 4th High-Level Seminar on Global Water Security Global water security as key for shared prosperity	Ministry of Water Resources, P.R. China
	SUBTITLE: Sharing China's latest policies and best practices for better water resource use optimization	

Session Code	Session Title	Organization
SS8	11th World Water Forum: "Action for a better tomorrow"	Indonesian Agency for Meteorology, Climatology, and Geophysics (BMKG)
SS9	Establishing Cooperation for Center of Excellence for Water and Climate Resilience	Ministry of Public Works and Housing of Indonesia
		UNESCO (WWAP, IHP and Jakarta Office)
SS11	Sharing of Knowledge, Spirit and Action on Sustainable Lake Management – Raising Momentum of World Lake Day	World Water Council
		Ministry of Environment and Forestry, Rep. of Indonesia
SS12	Mobilizing Political Commitment for Accelerating Climate Resilient Water Investments in Africa	UNEP
		AUC
SS13	Water, Food, Energy Nexus Using Smart Technologies	High-Level Panel Secretariat/GWP Africa
		ICID

Side Events

The side events of the 10th World Water Forum aim to broaden the discussion on water-related priorities, focusing on the topics proposed by potential organizers for presentation during the Forum week.

Side Events offers public and private stakeholders a platform to exchange their practices and activities to solve water challenges while engaging in in-depth dialogue and presenting showcases. The side events are relevant to the main theme of the Forum: “Water for shared prosperity.”

Session Code	Session Title	Organization
SE2	The 4th Trilateral Meeting of Water Resources Ministers among China, Japan, and ROK - Addressing Climate Change and Building Resilient Water Infrastructure	Department of International Cooperation, Science and Technology, the Ministry of Water Resources, China
SE4	Second Life Of Water: Three Decades of Improvement Lessons, Indah Water Konsortium’s Journey Towards Sustainable Sewerage Services in Malaysia	ASTRICE, Indah Water Konsortium Sdn. Bhd
SE5	Benefits from Transboundary Cooperation in the Nile Basin	The Nile Basin Initiative
SE6	Water & Faith	Meeting of Waters
SE7	3rd Asia International Water Week Stakeholders Consultation Meeting	Asia Water Council (Co-organizer: China Institute of Water Resources and Hydropower Research)
SE8	Subak and Spice Route: Local Wisdom Water Management	Directorate of Culture Development and Utilization; Ministry of Education, Culture, Research, and Technology Indonesia
SE9	UNESCO & i-WSSM Cooperation: Integrated Urban Water Management and Gender Equality for Water Security	UNESCO, i-WSSM, IWRA
SE11	IFC’s Utilities For Climate (U4C) CEO Roundtable	International Finance Corporation

SE44	Finance applied to water projects	Unesco Chair St'Andrews College Mumbai

Session Code	Session Title	Organization
SE45	Transboundary Water Cooperation: Water for Peace, regional integration and prosperity - Namibia's Experience	Ministry of Agriculture Water and Land Reform
SE47	Household Water Purification with Moringa Oleifera	Ghent University, Belgium
SE48	The Many Faces of Drought: Monitoring Societal Impacts and Building Resilience	Daugherty Water for Food Global Institute, University of Nebraska
SE51	Digital Water Management Technology - Deep technology(called Super gap technology)	Korea Water Resources Corporation
SE52	Reducing Water Investment Cost With Small Scale Investment	Green Economy Youth Organization (GEYO)
SE53	Executive Roundtable Lunch "Flowing Forward Faster: Best Practices in Corporate Water Stewardship"	Indonesia Global Compact Network (IGCN)
SE54	Water as a driver for peace and prosperity: lessons and prospects from West and Central African basins?	Department of water management and planning of Senegal (Ministry of Water and Sanitation)
SE55	Innovative Approaches to Seawater Desalination to Cope with Water Crises	Ministry of Environment of the Republic of Korea and Korea Water Forum
SE56	Water for Shared Prosperity Book Discussion – voice of youth and spotlight on Indonesia	World Bank
SE57	Seminar on Indonesia WEF Security Nexus Framework: From Nexus Thinking towards Nexus Doin'	Ministry of National Development Planning
SE58	Foresight climate change impact Indonesia: strategy for adaptation	Ministry of National Development Planning; UN Global Pulse
SE59	Sharing Session for Water Sector Transformation to Achieve Universal Access of Water Services	Directorate General of Human Settlements, Ministry of Public Works and Housing

Parallel Events

Parallel Events are supplementary gatherings that fall outside the formal framework of the 10th Forum’s official program. Despite this distinction, they enrol as channels for capturing the voices of significant stakeholders within the water

community. Parallel sessions provide an additional avenue for dialogue and input, ensuring that a broad spectrum of perspectives is considered in discussions surrounding water-related issues.

Session Code	Session Title	Organization
PE1	Accelerating more Resilient, Sustainable and Productive Paddy Farming	INWEPF Japan Committee
PE8	Water Resource Management In Iraq	Head of Planning Department at Center for Restoration of the Iraqi Marshlands and Wetlands/ Ministry of Water Resource
PE9	Emerging Paradigms for Water Sustainability in Cities: Case Studies in East Asia Region	UNESCO Regional Office for East Asia
PE10	Smart Technologies, innovation and promotion of indigenous knowledge systems for efficient and sustainable water management « Practical cases as solutions to water challenges	Algerian MOFA
PE11	Advancing scientific research solutions in water resources management to support the food security in Mediterranean region. Challenges and perspectives collaboration	Algerian MOFA
PE13	Splash of Innovation: Uplifting Indonesia's Water Solution Through Innovation	Coca-Cola Indonesia
PE15	Sharing Session on Water Supply and Sanitation	DJCK & Aguas de Portugal
PE16	Academics Sharing Session on Water	Ministry of Public Works and Housing, Indonesia

Expo and Fair

The 6 days Fair and expo (20 - 25 May 2024), will be among the highlight of the 10th World Water Forum. Not only to enliven the forum, the fair and expo will also provide an unique platform for the forum’s participant and public to further enhance water dialogues and awareness of water related issues and solutions.

The Fair will be open for the public and will also cover various programs, entertainments, and cultural performances including culinary from 34 provinces in Indonesia as well as participating countries. The Fair is held to attract more participants and to create a festive yet reflective atmosphere. This event will be equipped with learning centers, networking spaces, side events, and water-related performances to creatively raise public awareness about water issues.

The Expo will include country Pavilion and Organization Pavilion for Commercial or Non-Commercial organization that will form the main Exhibitions of the Forum. It will be held at 2 venues; Bali Nusa Dua Convention Centre and Bali International Convention Centre which located at the very epicenter of Bali’s premier luxury destination.

Cultural Night

The Cultural Night will be focusing on Indonesian culture, art and typical culinary from Sabang to Merauke, will take place on May 24, 2024 at Taman Bhagawan in Tanjung Benoa.

All food and drinks are served with food stalls, pass-around and live cooking concepts, showcasing the diversity of Indonesian flavors.

Prioritizing the taste and uniqueness of the ingredients, from the raw materials and spices to the cooking and serving process, will ensure an unforgettable gourmet experience for all invited guests.

In addition to the food and drinks, the Cultural Night will also feature various artistic performances from 38 Indonesian provinces on 5 mini stages at Taman Bhagawan, where the guests can interact and engage in different Indonesian cultures at the 10th World Water Forum.

Forum participants will also have the opportunity to buy typical Indonesian souvenirs in the souvenir store to take back to their home country.

As the event unfolds, the guests may explore the most beautiful beachfront areas in Taman Bhagawan.

The event will conclude with an entertainment program on the main stage, featuring young Indonesian talents who are already internationally renowned in Indonesia, from dancers, performers to national singers and DJs.

The Cultural Night ends with a fireworks show.

Youth Space Program

The Youth Space Program offers young people from around the world the opportunity to work together to strengthen their capacity on water-related issues and to unite to make the necessary changes that our societies and our planet need to ensure a sustainable and just present and future.

Youth is the agent of change who can bring new perspectives, energy and creativity to the management and protection of future water resources. The 10th World Water Forum considers the young generation as equal actors with other stakeholders and will involve them in the thematic, regional and political processes of the Forum.

The Indonesian government has prepared specific agendas for the youth in the 10th World Water Forum, such as the Bali Youth Plan and Young Water Sustainability Leaders (YWSL). The Bali Youth Plan has taken form and structure over the past 10 months, with the assistance of its 27-member working group. Leading up to the 10th World Water Forum, it has organized activities and competitions for a merit-based sponsorship program, bringing 73 young water enthusiasts to Bali.

The Bali Youth Plan will host a series of sessions and side events from May 20 to 24, 2024 including the World Youth Parliament for Water Sessions, World Water Council Youth Delegates Session, Hackathons and Youth Awarding.

Closing Ceremony

The closing ceremony will take place on May 24, 2024 at Mangupura Hall, Bali International Convention Center (BICC), Nusa Dua. This closing event will begin with the reading of the summary and conclusions of the 10th World Water Forum, and speeches by the two co-hosts of the 10th World Water Forum: the Indonesian government and the World Water Council.

This will be followed by the announcement and awarding of the Kyoto World Water Grand Prize 2024, organized by the Japan Water Forum in cooperation with the City of Kyoto and the World Water Council. Established in 2003, the prize is intended to recognize grassroots organizations that make significant contributions to solving water problems in developing countries.

Following the speeches by the distinguished guests from Japan, including Professor Taikan Oki, Mr. Sakurai and Professor Saatchi, the winner's representative, Ms. Iffah Rachmi, a specialist in water and sanitation hygiene (WASH) and youth development who is also behind the success of Youth with Sanitation Concern, will deliver the winning speech and receive the 2 million Japanese yen prize.

Youth with Sanitation Concern is an Indonesian youth community that aims to address COVID-19 challenges by building local sanitation infrastructure and promoting hygiene practices, especially in Lampung Province.

The closing ceremony will also include the symbolic handover of the host of the 11th World Water Forum and a cultural performance by the Kingdom of Saudi Arabia. The event will conclude with a keynote address and closing remarks by the Coordinating Minister for Maritime and Investment Affairs of the Republic of Indonesia.

Field Trip

Participants of the 10th World Water Forum are invited to join one of the two routes of the excursions that will take place on May 25, 2024.

The first route, the **Tabanan Route**, will take you to the Subak Museum, where you can discover traditional Balinese agricultural tools and the sophisticated Subak water management system, a UNESCO-recognised testimony to the harmony between humans and nature.

You will then continue the journey to the timeless beauty of Jatiluwih village, a UNESCO World Heritage Site since 2012, where the Subak irrigation system, a treasured heritage, has nourished verdant rice terraces for generations.

The journey ends with a panoramic view of the Bedugul Botanical Gardens, the largest botanical garden in Indonesia located in Candikuning village, Baturiti, Tabanan and the first botanical garden created by Indonesians.

The **Ubud Route** takes you on adventures in nature and begins at the Ubud Monkey Forest, a nature reserve and temple in the village of Padangtegal in Ubud. This sacred monkey forest sanctuary is about 12.5 hectares in size and is home to more than 1,200 long-tailed macaques.

The journey continues to the traditional Ubud Art Market and the Ubud Water Palace, a tranquil sanctuary that combines traditional Balinese architecture with the serenity of nature. After shopping for local souvenirs, you can immerse yourself in the calm and peaceful atmosphere of the garden with the rhythmic sound of the fountains and ponds.

Last but not least, your excursion ends with a spectacle of the forces of nature at Lake Batur, a volcanic crater lake in the caldera of Mount Batur in Kintamani, Bangli Regency. This enchanting landscape, created by the volcanic activity of the Ring of Fire, offers a unique blend of natural beauty and geological wonders.

Each itinerary is designed for 50 people and participants will be divided into 4 hi-ace bus units. Each bus has its own tour guide. Lunch and refreshments will be provided for all participants.

10TH WORLD WATER FORUM

Thematic Process

- ST1. Water Security and Prosperity
- ST2. Water for Humans and Nature
- ST3. Disaster Risk Reduction and Management
- ST4. Governance, Cooperation and Hydro-Diplomacy
- ST5. Sustainable Water Finance
- ST6. Knowledge and Innovation
- Cross Cutting Sessions
- Sub-theme Synthesis

Regional Process

- Asia Pacific Region
- Africa Region
- Mediterranean Region
- Americas Region
- Regional Synthesis

Political Process

- Political Segments

Ceremony, Others

- Special Session or Side Event
- Ceremonies (opening and closing)
- High-Level Panels
- Youth

Fullweek Program

Day and Date	All Week	DAY 1 Saturday May 18 th , 2024	DAY 2 Sunday May 19 th , 2024	DAY 3 Monday May 20 th , 2024
08.30 – 10.00	Registration			Opening Ceremony + (Leaders Meeting)
10.00 – 10.20				
10.20 – 11.50				
11.50 – 13.00				Lunch
13.00 – 14.30				Opening Fair and Expo Political: Ministers Thematic Sessions

FIELD TRIP

Day 1 & 2

THURSDAY, 16-19 MAY 2024 | 08.00 - 21.00

Keraton Ballroom, Nusa Dua Beach Hotel

Registration

SATURDAY, 18 MAY 2024 | 14.50 - 19.10

Kintamani 3, BNDCC 1

HELP Advisors Meeting

Coordinator : Prof. Kenzo Hiroki
HELP Coordinator

SUNDAY, 19 MAY 2024 | 08.30 - 18.10

Kintamani 1, BNDCC 1

Regional Preparatory Meeting

Coordinator :

1. Benedito Braga
2. Sergio I. Campos G.
Chief, Water and Sanitation Division, Inter-American Development Bank (IDB)
3. Joanna Fatch
Senior Policy Officer, African Ministers' Council on Water (AMCOW)
4. Nelson Gomonda
Director of Programmes, African Ministers' Council on Water (AMCOW)
5. Rashid Mbaziira
Executive Secretary, African Ministers' Council on Water (AMCOW)
6. Alain Meyssonnier
President, Mediterranean Water Institute (IME)
7. Yumiko Asayama
Chief Manager, Asia-Pacific Water Forum (APWF) Secretariat
8. Yongdeok Cho
Secretary General, Asia Water Council (AWC)
9. Lance Gore
Senior Water Resources Specialist, Asian Development Bank (ADB)
10. Satoshi Ishii
Director, Strategy and Policy, Water and Urban Development Sector Office, Asian Development Bank (ADB)
11. Ilhyang Park
Program Officer, Asia Water Council (AWC)
12. Jitendra K. Singh
Water and Sanitation Specialist, Asian Development Bank (ADB)
13. Eelco Van Beek
Water Sector Advisor/Individual Consultant, Asian Development Bank (ADB)
14. Changhua Wu
Vice Chair of Governing Council (Interim Chair), Asia-Pacific Water Forum (APWF)

SUNDAY, 19 MAY 2024 | 10.00 - 11.30

Kintamani 2, BNDCC 1

SE14 - Action Plan for International Collaboration on NRW Improvement

Coordinator :

1. Byeong-il Son
Manager, Korea Water Partnership
2. Tae-yong Seok
Assistant Manager, Korea Water Partnership

SUNDAY, 19 MAY 2024 | 08.30 - 18.10

Kintamani 3, BNDCC 1

HELP Advisors Meeting

Coordinator : Prof. Kenzo Hiroki
HELP Coordinator

SUNDAY, 19 MAY 2024 | 08.30 - 18.10

Kintamani 5, BNDCC 1

Political Preparatory Meeting

SUNDAY, 19 MAY 2024 | 08.30 - 18.10

Kintamani 6, BNDCC 1

Thematic Preparatory Meeting

Coordinator

1. Neil Dhot
Executive Director, AquaFed – The International Federation of Private Water Operators
2. Thomas Van Waeyenberge
Senior Adviser, Head of the Brussels Office, AquaFed – The International Federation of Private Water Operators
3. Andrea Erickson-Quiroz
Global Water Security Lead, The Nature Conservancy
4. Toshio Koike
Executive Director, ICHARM
5. Kenzo Hiroki
Coordinator, HELP Secretariat
6. Oriana Romano
Head of Unit, Water Governance and Circular Economy, OECD
7. Danielle Gaillard
Senior Advisor, SIWI
8. Satoshi Ishii
Director, Strategy and Policy, Water and Urban Development Sector Office, Asian Development Bank
9. Alex Money
Asian Development Bank (ADB)
10. Allison Woodruff
Principal Water Security Specialist, Asian Development Bank
11. Herry Trisaputra Zuna
Director General for Public Works and Housing Infrastructure Financing, Ministry of Public Works and Housing
12. Rahmah Elfithrih
Chief of Section on Capacity Development and Water Family Coordination, UNESCO

SUNDAY, 19 MAY 2024 | 10.20 - 16.20

Kintamani 7, BNDCC 1

AWC Bureau Meeting

SUNDAY, 19 MAY 2024

Garuda Wishnu Kencana (GWK) | 17.00 - 21.00

Welcoming Dinner
* Attendees by invitation only

MONDAY, 20 MAY 2024 08.00 - 19.00
Keraton Ballroom, Nusa Dua Beach Hotel
Registration

MONDAY, 20 MAY 2024 08.30 - 10.00
Mangupura Hall, BICC
Opening Ceremony * Attendees in Mangupura Hall: only by invitation * Mirroring venue available in Grand Hyatt Bali

MONDAY, 20 MAY 2024 10.00 - 11.50
Grand Ballroom, Grand Hyatt Bali
Youth, Water, and Technology : An Interactive Forum * Attendees : Open for public

MONDAY, 20 MAY 2024 10.20 - 12.00
Nusantara Hall, BICC
10th World Water Forum Leaders' Meeting * Attendees only by invitation

MONDAY, 20 MAY 2024 13.00 - 14.30	
Kintamani 1	
T3A2 Climate Resilient Flood Risk Management Approaches: Towards A Greater Resilience in the Face of Climate Change	
Sub-Theme Coordinator :	<ol style="list-style-type: none"> 1. Toshio Koike <i>Executive Director, ICHARM, Japan</i> 2. Kenzo Hiroki <i>Coordinator, HELP Secretariat</i>
Topic Coordinator :	Annegien Tijssen <i>Senior Climate Adaptation and Disaster Risk Management Specialist, Deltares, Netherlands</i>

Session Coordinator :

1. Jesse E. Bell
Director of Water, Climate and Health, Daugherty Water for Food Global Institute, University of Nebraska, USA
2. Touli Sami
Director, National Drought Mitigation Center, University of Nebraska-Lincoln, USA

Political Process

The thematic process is to share best practices and experiences, advocate for themes and specified topics, develop cooperative methods and partnerships on particular thematic solutions, influence the policy-making process, and commit to action with customized solutions to local and global water challenges.

Expected Outcomes

The thematic process identifies critical challenges and opportunities related to a specific thematic area and explores practical and applicable solutions and best practices. The six themes drive Forum participants of the World water community towards a more sound, sustainable, healthier, peaceful prosperity and resilience of our planet. Six themes, during the Forum process, will be identified with more specific topics where the most imminent issues are included and where solutions with actions are needed. The thematic process will be expected to have results of tangible methodologies with practical strategies to make plans executed and implement solutions.

Water Security and Prosperity

is one of the most critical our world has been facing for decades and water insecurity is becoming a growing threat in a world that is rapidly changing due to the impacts of population growth, unsustainable development, raising inequality and climate change, and the ensuing increasing competition over water resources.

Water for Humans and Nature

refers that water is a critical resource for all life on Earth, both for humans and nature. We depend on healthy, functioning ecosystems for our water security. They provide us with a plethora of goods, services, and wellbeing. The degradation or destruction of freshwater ecosystems inevitably leads to acute problems affecting aquatic biodiversity and our livelihoods and health.

Disaster Risk Reduction and Management

As extreme weather events – floods, droughts, heat waves, storms, etc. – due to the changing climate – are becoming increasingly frequent and destructive, and most are linked to the hydrological cycle, Disaster Risk Reduction and Management is a crucial topic to be discussed at the 10th World Water Forum. Moreover, Indonesia, as a host country of the Forum, is frequently struck by water-related disasters, particularly flooded cyclones, and prioritizes this issue.

Sustainable Water Finance

The lack of funding for water is another crucial issue to address, as millions of people throughout the world still suffer from insufficient access to clean water and sanitation, from unreliable or unavailable water supply, and increased exposure to water-borne diseases and water-related disasters induced by climate change. Rapid urbanization creates additional challenges for water supply and sanitation in very densely populated areas, meanwhile leaving rural and natural areas behind.

Governance, Cooperation and Hydro-diplomacy

Good water cooperation amongst global actors as well as sound governance within the water community and beyond are vital to overcome the growing competition over water resources, improve mutual understanding and identify acceptable trade-offs between all water users, including other sectors. Hydrodiplomacy and international negotiations, notably based on legal instruments, are a good means to foster peace mediation and conflict prevention.

Knowledge and Innovation

Scientific progress and technological innovation are rapidly advancing in the water sector, with new tools, instruments and methodologies available. This wealth of knowledge, as well as traditional and indigenous know-how, needs to be shared, taught, made broadly available and scaled up to help address the growing water challenges the world community is facing.

Regional Process

Collaboration and Partnership Building by establishing new partnerships and collaborations to tackle local water-related challenges.

Dialogues and plans to implement solutions may only be responsive when those are rooted in local realities. The 10th World Water Forum will therefore attempt to reinforce regional processes which will articulate thematic and political issues from local perspectives and regional views. This will result in more customized political commitment for action and local level and practical solutions from thematic areas. The regional process also is to understand different regional experiences and knowledge in water management. To do this wide range of multi-stakeholders from particular regions and sub-regions will be required and invited to draw localized solutions that could be realized in the regional context.

Expected Outcomes

Identifying and addressing regional water challenges: through a process of prioritizing regional water challenges and developing local strategies to address them. Finding better solutions for local and regional water issues by exchange of knowledge and experience in local cases, perspectives, and best practices for enhanced water security and sustainable water use.

Collaboration and Partnership Building by establishing new partnerships and collaborations to tackle local water-related challenges. Raising awareness on the importance of local and regional water and the need to manage it with political commitment and customized solutions with advanced technology and innovation as well as well-developed policy.

05

THE
VENUE

Main Venue Forum

The 10th World Water Forum will be held at 2 venues; Bali Nusa Dua Convention Centre and Bali International Convention Centre which located at the very epicenter of Bali's premier luxury destination.

Bali International Convention Center (BICC)

Choosing a location for a large global meeting is a challenging task. Size, security, access for the world main air carriers, full back up equipment, luxury accommodation within easy reach, professional interpreting and media facilities, first class management and catering, unique tour and entertainment options are all to be taken into consideration.

Address: Kawasan Pariwisata Nusa Dua, BTDC Lot N-3, Benoa, Kuta Selatan, Benoa, South Kuta, Nusa Dua, Bali 80363. Located in Indonesia Tourism Development Corporation (ITDC) area, can accommodate more than 5.000 people.

■ Bali International Convention Center (BICC)

Supporting Venue

Kura-Kura Bali

In the captivating realm of Bali, a Special Economic Zone, Kura Kura Bali at Jl. Kura Kura No. 1, Serangan, Denpasar Selatan, Bali 80229, unfolded. The project started with visionary foresight, aimed to pioneer innovations with an unwavering dedication to the principles of sustainability.

With passions to preserving Bali's natural beauty and cultural heritage, Kura Kura Bali envisions creating an eco-conscious living while adopting the Balinese principle of happiness, 'Tri Hita Karana,' by harmonizing with the environment, the people, and the spiritual.

Immerse in the vibrant realm of Kura Kura Bali, where lush native flora and tranquil inland waters form a flourishing sanctuary for butterflies and dragonflies. Experience the enthralling activity of bird watching, as our sanctuary is home to over 100 permanent bird species and welcomes an additional 160+ species during migration periods. Observe the peaceful coexistence of diverse wildlife in this serene paradise.

■ Kura-Kura Bali

Garuda Wisnu Kencana (GWK)

Bali is known for its rich cultural heritage, and the GWK Cultural Park is one of the best places to experience it. Located in Jimbaran, this massive park is dedicated to showcasing the island's art, dance, music, and traditional culture. Visitors to the park can enjoy a wide range of attractions, including breathtaking views, monumental statues, and cultural performances.

The Ultimate Destination for Those Seeking an Immersive Cultural Experience in Bali. GWK Cultural Park is home to some of the most iconic cultural landmarks in Bali, including the magnificent Garuda Wisnu Kencana statue, which stands tall at 121 meters and is a representation of the Hindu god Vishnu and his mount, the Garuda bird.

■ Kura-Kura Bali

Taman Bhagawan

Taman Bhagawan is a unique private venue that captures the best of Indonesian culture combined with contemporary sophistication. Hand-carved joglos, intricately-designed buildings and beautiful Balinese statues and fountains are set among sweeping lush green lawns and tropical gardens adjoining the picturesque white sands of Nusa Dua.

Taman Bhagawan is one of Bali's most unique events venue with uninterrupted views of the sea. It is an ideal gathering place for not only corporate events, weddings but also special events including concerts, festival and exhibition. Being a purpose built facility,

Fair & Expo

Fair

The 6 days Fair and expo (20 - 25 May 2024), will be among the highlight of the 10th World Water Forum. Not only to enliven the forum, the fair and expo will also provide an unique platform for the forum's participant and public to further enhance water dialogues and awareness of water related issues and solutions.

The Fair will be open for the public and will also cover various programs, entertainments, and cultural performances including culinary from 34 provinces in Indonesia as well as participating countries. The Fair is held to attract more participants and to create a festive yet reflective atmosphere.

This event will be equipped with learning centers, networking spaces, side events, and water-related performances to creatively raise public awareness about water issues.

It will be held at 2 venues; Venues Bali Collection & Tsunami Shelter Plaza Kuta which is known for its long stretch of golden sand, beautiful sunsets, and vibrant atmosphere.

Expo

The Expo will include country Pavilion and Organization Pavilion for Commercial or Non-Commercial organization that will form the main Exhibitions of the Forum. It will be held at 2 venues; Bali Nusa Dua Convention Centre and Bali International Convention Centre which located at the very epicenter of Bali's premier luxury destination.

We sincerely welcome users, researchers, scientists, and suppliers to connect and build networks, as well as to showcase their actions and solutions in improving water quality and establishing sustainable water management from interdisciplinary perspectives. Expo also offers a medium to display and promote your outstanding research, products, and technologies, cultivate new commercial partnerships,

and secure new sources of investment. The fully integrated access to The 10th World Water Forum venues (exhibitions, cultural fair, and conferences) will allow participants and visitors to attend all the activities within reachable areas.

Come and join with thousands of participants who have joined the last forum in 2022 and be a part of our participant at the fair and expo of the 10th World Water Forum, together with global audiences including state leaders and ministers, almost 10.000 delegates, 30.000 participants from 172 countries and tourists from all around the world who visit the beauty of Bali Island.

USEFUL INFORMATION

Language

Standard Indonesian is the official language.

Climate

The climate of Indonesia is almost entirely tropical. The uniformly warm waters that make up 81% of Indonesia's area ensures that temperatures on land remain fairly constant, with the coastal plains averaging 28°C, the inland and mountain areas averaging 26°C, and the higher mountain regions, 23°C. Temperature varies little from season to season, and Indonesia experiences relatively little change in the length of daylight hours from one season to the next.

Electricity

The voltage in Indonesia is 220V, 50Hz, AC. Participants are encouraged to bring a plug adaptor

Currency

Exchange Rate:

1 USD = 14,995 IDR
1 EUR = 16,640 IDR
1 GBP = 18,846 IDR

Indonesian Rupiah (IDR) is the official currency in Indonesia.

(Source: Bank BNI)

Time Zone

The time zone is Greenwich Mean Time

(GMT) +8 hours in Bali.

There is no daylight saving

BALI
AT A GLANCE

The Incredible Monument of Garuda Wisnu Kencana

On the Bukit Peninsula lies a park with its iconic majestic monument called Garuda Wisnu Kencana or simply known as GWK. It presents the limestone plateau with a beautiful serene park in southern Bali. The cultural park is dedicated to embrace and preserve the art, cultural and spiritual aspects of the Island of Bali. This 60-hectare park offers a place to watch art & cultural performances, observe exhibitions, and experience conferences. In addition, there are breathtaking spots for you to spend the day.

The central icon is the incredible monument of Garuda Wisnu Kencana, one of the tallest and largest modern statues with over 120 meters in height and 64 meters in width. It is conceptualized by Nyoman Nuarta, Indonesia's finest contemporary sculptor. The landmark depicts the Hindu God Vishnu riding aloft on his winged mount Garuda. Vishnu is considered a member of the holy trinity of Hinduism along with Shiva and Brahma. He is the most important God of Vaishnavism, the largest Hindu sect. Garuda is an eagle-like creature with human features in Hindu mythology.

Ubud

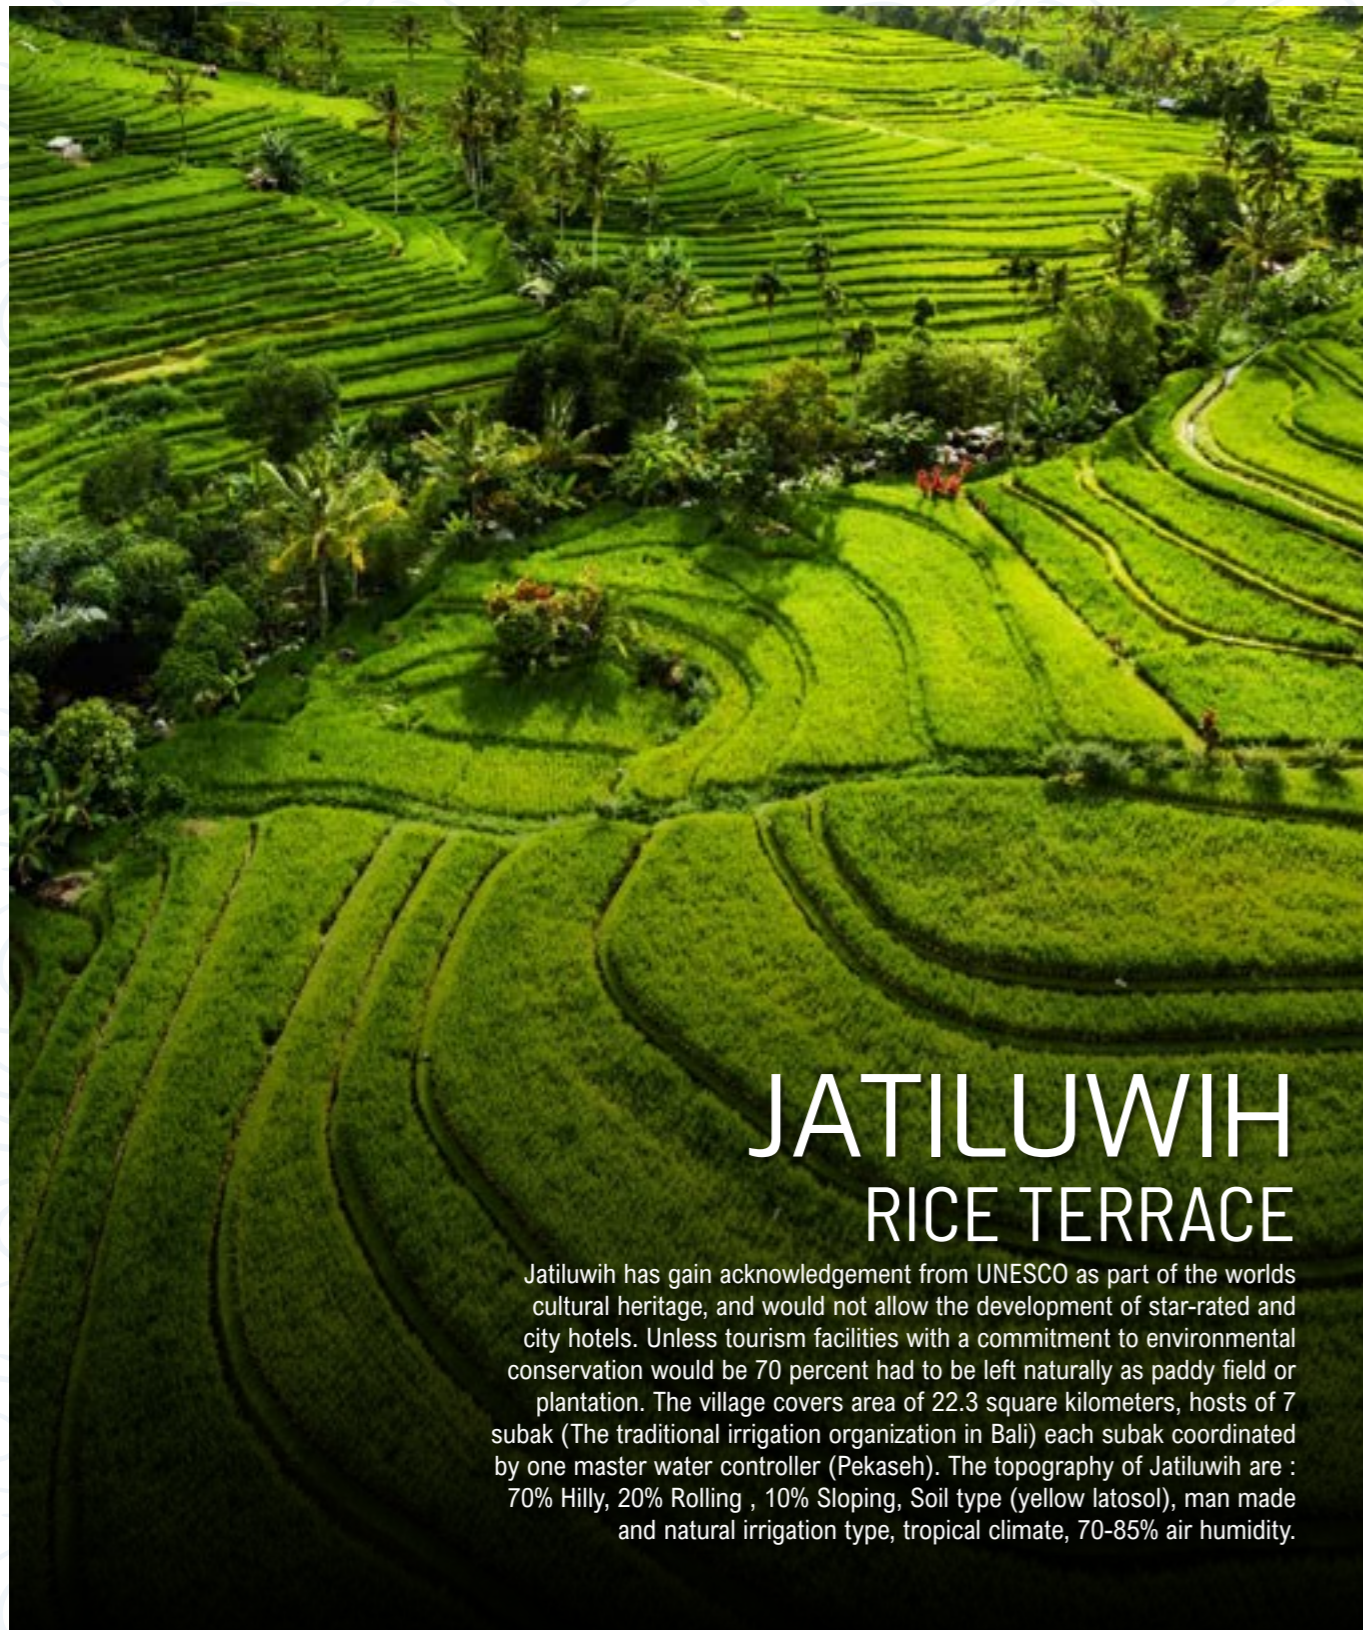

Between Tradition and Art

Proceed to the Village Mas, the island's center for wood carving and handicrafts. Wood carvings in this village covers wide dimensions such as devoting idols (arca), representative dimensions of Balinese everyday life and the abstract dimension existing to reality, dynamics and life philosophy. Following the stop, continue to Ubud, Bali's cultural heart.

The area is located in the cool mountains; this traditional town is the home of the Bali Royal Family, as well as a flourishing art center and most of Bali's museums and galleries area centered in Ubud. These museums and galleries offer painting, wood carvings, textiles and all kinds of souvenirs for viewing and of course, purchase. Before returning to your hotel, we will visit the village of Celuk, the center of silver and gold handicrafts in Bali.

JATILUWIH RICE TERRACE

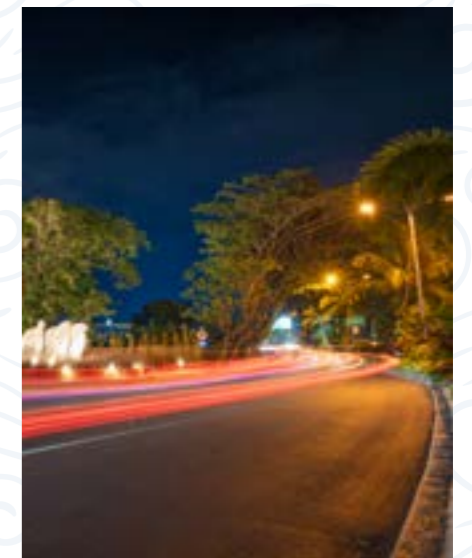

Jatiluwih has gain acknowledgement from UNESCO as part of the worlds cultural heritage, and would not allow the development of star-rated and city hotels. Unless tourism facilities with a commitment to environmental conservation would be 70 percent had to be left naturally as paddy field or plantation. The village covers area of 22.3 square kilometers, hosts of 7 subak (The traditional irrigation organization in Bali) each subak coordinated by one master water controller (Pekaseh). The topography of Jatiluwih are : 70% Hilly, 20% Rolling , 10% Sloping, Soil type (yellow latosol), man made and natural irrigation type, tropical climate, 70-85% air humidity.

I Gusti Ngurah Rai GRAND FOREST PARK

I Gusti Ngurah Rai Grand Forest Park, Bali is a mangrove conservation and educational tourism area which is one of the goals of the G20 delegation's visit in 2022. So far, the Ngurah Rai Bali Tahura is often visited by tourists who want to see the mangrove forest and the biodiversity in it. The flora and fauna which are a collection of biodiversity in an area of 1,300 hectares consist of mangrove forests, various types of birds and aquatic animals. There are 33 types of mangroves or mangroves there, but most are white pidada (*Sonneratia alba*) or prapat in the local language. Other types, namely white mangrove (*Rhizophora apiculata*) and tancang (*Bruguiera gymnorrhiza*). Thousands of mangrove trees here thrive green and become the best fortress for the southern coastal area of Bali.
