Session Description including objectives and expected outcomes (500 words maximum):

The 2023 UN World Water Development Report stressed that, in order to achieve water-related SDGs, efforts must at least quadruple. This session will advocate that part of these additional efforts should focus on building the capacities of institutions managing water. It will present the interest to analyze the existing demand and offer in training and the benefits to develop training programs to improve the technical and managerial skills of professionals and stakeholders of water management.
